ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS:

No on-call schedule for nights and weekends. It is expected students will learn the approach to the oliguric patient, the work-up of acute & chronic renal failure, and appropriate management of the approach & treatment of hypertension & how to evaluate and manage acid-base & fluid & electrolyte disorders. The student will also have exposure to peritoneal and hemodialysis, as well as Continuous Ambulatory Peritoneal Dialysis (CAPD). The outpatient experience is designed to familiarize the student with the longitudinal course of renal disease and offer a more practical approach to diagnosis and management of problems in Nephrology.
DESCRIPTION: This course involves the student in a variety of inpatient and outpatient activities related to this consultation service. The student would learn under the guidance and teaching of attending nephrologists and internal medicine residents. Among the typical learning opportunities are evaluation of acute renal failure, management of chronic renal failure and hemodialysis, evaluation and management of hypertension, and assessment and treatment of fluid and electrolyte disorders.

COURSE OBJECTIVES (in order of importance)
1. Knowledge of the pathogenesis, natural history, orderly investigation, differential diagnosis, and management of acute and chronic renal disease, acid-base disturbances, and fluid-electrolyte disorders.
2. Knowledge of the medical problems of patients with chronic renal failure.
4. Oral presentations.
5. Library research.
6. Awareness of cost effectiveness in clinical decision making.
7. Gain experience in a consultative role.

DURATION: 2 weeks

2007-2008 ROTATIONS BEGIN WEEKS:

By Arrangement

DESCRIPTION: The student will work one-on-one with a busy pulmonary-critical specialist whose practice is divided between a large teaching hospital (Cedars-Sinai) and a private office setting. The student will be exposed to the entire spectrum of pulmonary diseases and critical care problems. There will be emphasis on performing histories and physicals as well as developing differential diagnoses and appropriate diagnostic and therapeutic plans. The student can participate in invasive procedures such as fiberoptic bronchoscopy, endotracheal intubation and thoracentesis. The student will learn how to interact with patients and families frequently in serious, life-threatening situations. The student will be expected to do in-depth reading about the patients he/she sees and review various other topics such as pulmonary physiology.

2007-2008 ROTATIONS BEGIN WEEKS:
2, 5, 8, 11, 14, 17, 20, 27, 30, 33, 36, 39, 42, 45, 48

DESCRIPTION: The hepatology and liver transplantation programs at CSMC are consultative services for the entire hospital. We evaluate a wide range of liver diseases and determine which patients require liver transplantation. Emphasis will be on history and physical examination with subsequent differential diagnosis and treatment. We have an extensive library and filing system for all hepatology subjects.

STUDENT OBJECTIVES (in order of importance)
1. Increase knowledge of various hepatological diseases such as viral hepatitis, alcoholic liver disease, autoimmune hepatitis, cholestatic liver disease, and hepatic failure
2. Evaluation of patients for liver transplantation
3. Complete history and physical examination in patients with liver disease
4. Basic science knowledge pertaining to hepatobiliary pathophysiology
5. Interpretation of liver tests in the serum
6. Procedures: Paracentesis, liver biopsy
7. Ability to do literature searches on topics re patient care
8. Pathological interpretation of liver biopsies
9. Radiological interpretation of the liver with ultrasound, CT scan, MRI, and ERCP
10. Medical record keeping (data collection, recording, and consultations).

REPORT TO: Yutaka Nihara, M.D., Dept. H. King Drew Medical Center, Hematology Oncology Clinic: 2A, 9:00 a.m.
PREREQUISITES: Internal Inpatient and Ambulatory Medicine
AVAILABLE FOR EXTERNALS: No
STUDENTS / PERIOD: max 2  min 1
DURATION: 3 weeks
2007-2008 ROTATIONS BEGIN WEEKS:
2, 5, 8, 11, 14, 17, 20, 27, 30, 33, 36, 39, 42, 45
DESCRIPTION: The Hematology/Medical Oncology Service at King Drew Medical Center is a consultative service for the entire hospital, except Pediatrics. A large variety of hematologic and oncologic disorders are seen. Emphasis is placed on clinical evaluation of hematologic and oncologic disorders and various teaching aids such as slide sets and self-assessment examinations are available. While on the Hematology/Medical Oncology Service, students will be under the immediate supervision of the Clinical Hematology/Medical Oncology Resident. Students will present cases at Team Rounds and Hematology Grand Rounds, participate in the Hematology and the Medical Oncology Clinics, and weekly Hematology Seminars.

COURSE OBJECTIVES (in order of importance)
1. Increase knowledge of the pathogenesis, natural history, orderly investigation, differential diagnosis, and management of the commonly seen hematologic and oncologic disorders. These include anemia, thrombocytopenia and hemorrhagic disorders, breast, lung and colon cancer, elevated hematocrit, and leukemia and other hematologic malignancies.
2. Interpretation of tests such as CBC, red cell indices, differential cell counts, protime, PT, bleeding time, etc.
3. Peripheral blood smear interpretation.
4. Improve medical decision making: analysis of medical data and synthesis of information.
5. Medical record keeping (e.g., data collection and recording, appropriate format for writing consultations).
6. Increase the student’s confidence and ability to give oral presentations.
7. Increase awareness of the basic scientific principles behind clinical disease.
8. Practical, cost effective assessment and management of common hematologic and oncologic disorders.
9. Library research and interpretation of hematologic and oncologic literature.

STUDENT EXPERIENCES
COMMON PROBLEMS/DISEASES
1. Iron deficiency anemia  INPATIENT: 50%
2. Thrombocytopenias  OUTPATIENT: 50%
3. Sickle cell disorders & thalassemia
4. Anemia of chronic diseases
5. Acquired coagulopathy
6. Leukemias and lymphomas
7. Cancer of breast, lung, and colon
8. Elevated hematocrits

APPROXIMATE # OF PATIENTS EVALUATED EACH WEEK BY STUDENT: 5 - 8
TOTAL # OF PATIENTS EVALUATED EACH WEEK BY ENTIRE SERVICE: 50

TYPICAL WEEKLY SCHEDULE

ON-CALL SCHEDULE & WEEKEND ACTIVITIES: There is no night duty.

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS: They are also expected to attend Morning Report, Medical Grand Rounds, the Internal Medicine Lecture Series, and Morbidity and Mortality Conference.

FAX: 
E-MAIL: 

REPORT TO: I.D. Fellow Room 4007A, 9:00 a.m., first Monday of the day for required IM selective, meet in room 4009 @7:30 a.m.

PREREQUISITES: Inpatient Medicine and Surgery

AVAILABLE FOR EXTERNAL: Yes

STUDENTS / PERIOD: max 2 min 1

DURATION: 3 weeks

2007-2008 ROTATIONS BEGIN WEEKS:
2, 5, 8, 11, 14, 17, 20, 27, 30, 33, 36, 39, 42, 45

DESCRIPTION: The purpose of this sub-internship is to introduce the student to a comprehensive approach to adult infectious diseases encountered in an ethnically diverse population and to enable the recognition, evaluation, management and prevention of infectious diseases, both in concept and practice.

COURSE OBJECTIVES (in order of importance)
1. Understanding pathogenesis of infection and host defense mechanisms and responses to infection.
2. Knowledge of the epidemiology, etiology, pathogenesis, diagnosis, differential diagnosis and management of complex out and in-patient infectious disease problems: pneumonia, urinary tract infections, meningitis, endocarditis, skin and soft tissue infections, bone and joint infections, fever of unknown origin, systemic mycoses, mycobacterial infections surgical infections, prosthetic infections, septic shock, infections in the immunocompromised host and travel and tropical infections including parasitic infections
3. Interpretation of x-rays, radionuclide scans and CT’s and MRI’s.
4. Knowledge of the basic pharmacology and use of antimicrobial agents
5. Knowledge of immunization and other immunoprophylaxis, chemo-prophylaxis and prevention of infection.
6. Knowledge about appropriate infection control practices.
7. Understand and review new and emerging infections and the concept of outbreak investigation.
8. Medical judgment, analysis of medical data, and synthesis of information.
9. Ability to obtain and document a detailed, pertinent, focused and independent history and physical examinations.
10. Learn appropriate format for writing consultations.
11. Oral presentation of cases.
12. Understand in charge planning of communicable disease cases

ON-CALL SCHEDULE & WEEKEND ACTIVITIES:

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS:

DESCRIPTION: This elective is designed to provide the student with a stimulating ambulatory care and private office-like experience. The student will have his/her own consultation and examining room and determine his/her own scheduling and patient load. The student will have the opportunity to work closely with a variety of subspecialty and General Internal Medicine Faculty, and will be able to individually structure his or her clinic schedule from the full range of medical specialty clinics in addition to ambulatory care walk-in/urgent care clinics (see typical weekly schedule).

ON-CALL SCHEDULE & WEEKEND ACTIVITIES:

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS: Orientation will occur with inpatient attending at 9:30 a.m. in the Geriatric Medicine office on floor 3 corridor. Geriatric patients account for large share of inpatient and outpatient medical and surgical practices. Students who plan careers in any adult surgical or medical specialty will perform better if they have learned effective ways of managing geriatric patients.

TOTAL # OF PATIENTS EVALUATED EACH WEEK BY ENTIRE SERVICE: 20

TYPICAL WEEKLY SCHEDULE

ON-CALL SCHEDULE & WEEKEND ACTIVITIES: There are no on-call responsibilities.

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS: This facility provides learning opportunities in the Nursing Home to develop knowledge and skills in all areas of geriatric assessment and management, including health status assessment, therapeutic and rehab programs for elderly patients. Chronic illness is viewed from the perspective of "treatable disease" to improve overall functioning for elderly patients. Issues of end of life care are explored.

ON-CALL SCHEDULE & WEEKEND ACTIVITIES:

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS:
This is a clinically oriented consultation service which provides exposure to a wide variety of renal disease and fluid-electrolyte and acid-base derangements. Students will be expected to see up to five patients per week, work-up each patient, and present and discuss the findings with the renal faculty. For inpatient work-ups and discussions, emphasis will be on problem solving using logical, reasoned thinking rather than mere reciting of irrelevant facts. Laboratory demonstrations will provide exposure to detailed examination of urine.

COMMON PROBLEMS/DISEASES
1. Acute renal failure
2. Chronic renal failure
3. Hypertensive renal disease
4. Nephrotic syndrome
5. Fluid-electrolyte problems
6. Urinary tract infection
7. Toxic nephropathy
8. Dialysis Complications

ON-CALL SCHEDULE & WEEKEND ACTIVITIES: Students will have night call every third night with CCU Resident. CCU Rounds from 8:30 – 10:30 a.m., Saturdays and Sundays.

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS:

PREREQUISITES: Medicine, Neurology, Psychiatry, Radiology, Surgery, and Obstetrics/Gynecology

AVAILABLE FOR EXterns: Yes

STUDENTS / PERIOD: max 2 min 1

DURATION: 3 weeks

2007-2008 ROTATIONS BEGIN WEEKS:
12, 15, 18, 21, 27, 30, 36, 39, 42, 45

DESCRIPTION: Each student will spend three weeks as a sub-intern on the Cardiac Care Unit and will work up and participate in the management of patients under the guidance of the Resident & Attending Physician. Rounds will be made daily, including weekends. The students will be expected to present and discuss their cases and participate in the discussion of other cases. They will also participate in all Cardiology conferences. In most instances, students will be on call with the residents every 3rd night.

SUPPORTING FACULTY:
CCU- Drs. Middlekauff, Tillisch, Goldhaber, Weiss, Honda, Bostrom, Cesario, Watson and MacLellan

COURSE OBJECTIVES (in order of importance)
1. Knowledge of pathogenesis and natural history of cardiac disease; the orderly investigation, differential diagnosis, and management of coronary artery disease, valvular heart disease, and cardio-myopathies.
2. Knowledge of the pharmacology of all major classes of cardiac medication.
3. Clinical skills: medical interviewing and physical examination.
4. Medical judgment, analysis of medical data, and synthesis of information.
5. Interpretation of EKGs and skill in interpreting data from Swan-Ganz catheters.
6. Development of an understanding of the principles, costs, and benefits and proper use of routine cardiac tests, such as echo-cardiograms, treadmill tests, and radionuclide scans.

2007-2008 ROTATIONS BEGIN WEEKS:
2, 5, 8, 11, 14, 17, 20, 27, 30, 33, 36, 39, 42, 45

DESCRIPTION:  This elective is in a critical care unit at a county hospital. The unit is a combined MICU and CCU. The student will have direct patient responsibility with a variety of diseases including GI bleed, unstable angina, diabetic ketoacidosis, and respiratory failure.

COURSE OBJECTIVES (in order of importance)
1. To gain knowledge of the pathophysiology and treatment of common critical care conditions including GI bleed, unstable angina, MI, DKA, respiratory failure, sepsis, congestive heart failure, shock, and pneumonia.
2. Learn uses of anti-arrhythmics, vasodilators, pressors.
3. Learn to interpret arterial blood gases, electrolytes, hemodynamic monitoring
4. To gain procedure skills including arterial lines, central lines, thoracentesis, paracentesis lumbar puncture.
5. To gain experience in managing patients on ventilators.

DESCRIPTION: St. Mary Medical Center is a 400-bed community hospital. Students participate in the diagnostic and therapeutic decisions as a member of the ward team. They are responsible for daily notes and orders. The student will be able to participate in a variety of procedures under supervision and guidance. A number of daily didactic primary care and subspecialty conferences are provided with special emphasis on primary care, women's health, and geriatric medicine. The patient mix includes disease processes typically encountered in a community hospital setting. One unique aspect of the rotation is the opportunity to provide medical consultations to non-medical services (Obstetrics, Surgery, Psychiatry). Teaching and supervision is provided by attending physicians in private practice, full-time medical education faculty and Internal Medicine residents.

TYPICAL WEEKLY SCHEDULE

ON-CALL SCHEDULE & WEEKEND ACTIVITIES: The Sub I will take call with one of the residents on every fifth night. Weekend call will be assigned by the residents; however, there should be one day off per week (week or weekend day).

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS: Though not assigned to clinic, subinterns are strongly encouraged to follow up on their patients in the Internal Medicine suite with the patients’ continuity of care provider.

STUDENT EXPERIENCES

COMMON PROBLEMS/DISEASES
INPATIENT: 100%
OUTPATIENT: 0%
CONSULTATION: 0%
PRIMARY CARE: 100%

COURSE OBJECTIVES (in order of importance)
1. Advanced knowledge of general medical disease processes or problems (e.g., infections, anemia, metabolic disorders, heart failure, and cancer).
2. Improved history-taking and physical examination.
3. Improved clinical skills, including medical judgment and analysis of medical data and synthesis of information.
4. Diagnosis and therapeutic management of acutely ill patients and/or complex medical problems (e.g., sepsis, electrolyte problems, and FUO).
5. Improving the doctor-patient relationship and medical-ethical issues of practice.
6. Interpretation of laboratory tests (e.g., electrolytes, liver function tests, blood gases, EKGs, pulmonary function tests).
7. Basic science foundation of pathophysiologic mechanisms of disease.
8. Integral role of participation in whole health care team.
9. Clinical decision-making a changing health care delivery system.
10. Improved proficiency in common medical procedures.

ON-CALL SCHEDULE & WEEKEND ACTIVITIES: Students on this elective will be on call every third night and will participate during weekend rounds.

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS: Each student will be assigned to a team consisting of a resident and an intern on-call every third night. The students will be under the supervision of full-time attendings and private physicians. Daily work rounds are held with the attending physician and fellow in critical care medicine. Numerous subspecialty consultants from the private and full-time attending staff are available. In addition, formal didactic conferences will be given four times weekly.

STUDENT COORDINATOR: Judy Jacobs (310) 423-4658

DESCRIPTION: Resident/intern teams are on call every third night; subinterns every 6th night. Team of 1 resident, 1 intern, and 1 student usually admit anywhere from 2 - 4 patients. Cardiology fellow is present 24 hrs/day in the unit. The students assume responsibility for work-up of patients and preparation of the plan of treatment, and are encouraged to participate in the procedures (under proper supervision). Teams round daily every morning with the full-time attending. Students are expected to present their patients, and examine them with the attending and discuss the plan of action. During on call team rounds (afternoon) with the cardiology fellow and full-time attending, patients are presented in a brief form to the team on call for proper continuation of care. Every other morning after rounds, there are lectures, medical teaching conference, or EKG Lecture organized specifically for the rotating students. Post call team leaves by 12 noon, non-on call team leaves by 3:30p.m.

ON-CALL SCHEDULE & WEEKEND ACTIVITIES: Call is every third night. Saturday and Sunday rounds from 8:30 – 12:00.

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS: This elective provides excellent preparation for a medical or surgical internship and lays the groundwork for other specialties, e.g., anesthesia. The rotation emphasizes student autonomy and responsibility under the watchful eye of a resident, pulmonary fellow, and staff physician. The student will be the primary physician for the patients they work up and follow.

ON-CALL SCHEDULE & WEEKEND ACTIVITIES: On call every fourth night. This includes weekends when call occurs on a weekend evening. Students are expected to attend weekend CCU rounds if they have patients in the unit.

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS: This elective will help the student gain a comprehensive appreciation of the complexities of cardiology as well as an introduction to the instruments used in invasive and non-invasive evaluation of the entire spectrum of cardiac disease. The student should be comfortable with EKG interpretation by the end of the rotation.

**ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS:**

- The inpatient services give students an opportunity to provide primary care to acutely ill, hospitalized elderly patients. The purpose is to train students in the peculiarities of the presentation of ailments in older groups with special emphasis on therapeutic strategies.

**PREREQUISITES:**

- Medicine and Surgery

**REPORT TO:**

- Drew University @ 8:30 a.m., 1731 E. 120th Street, Suite 1106.

**STUDENT COORDINATOR:**

- Deborah Christian
- (323) 563-4822
- E-MAIL: susan.orrange@va.gov

**SUPPORTING FACULTY:**

**COURSE CHAIR:**

- Sunil Singhania, D.O.
- (310) 668-6116

**COURSE OBJECTIVES (in order of importance)**

1. Knowledge of biological and psychosocial aspects of aging
2. Knowledge of the pathogenesis, natural history, differential diagnosis, evaluation and management of common diseases or disorders of the elderly
3. Knowledge of the impact of aging on drug pharmacology
4. Clinical skills: improving medical and psychosocial evaluation of the elderly, emphasizing a functional assessment approach
5. Medical decision-making: emphasis on altered presentation of disease, multiple illnesses, risk-benefit, costs, rehabilitative potential, and end-of-life issues
6. Improving health communication and interaction with the elderly
7. Interpretation of tests: normal values for elderly; functional changes due to aging
8. Understanding societal and personal attitudes toward aging
9. Evaluation and management of care in geriatric inpatient ward
10. Consultations for elderly patients seen in emergency room
11. Geriatric consultations for inpatient services
12. To participate in outreach programs designed to offer health screenings to seniors

**DURATION:**

- 3 weeks
- Available for externs: No

**ON-CALL SCHEDULE & WEEKEND ACTIVITIES:**

- No night calls; weekend rounds by arrangement. Faculty Teaching Rounds on Saturday and Sunday mornings. Heart – Halting Elder Abuse Response Team. Geriatric Chair Rounds, Saturday, 10:30 – 12:00.

**ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS:**

- The clinical program of Geriatrics and Gerontology has special relevance to inner city minorities and provides an opportunity for outreach programs. The clinical program includes preventive programs for the elderly at senior centers and provides an opportunity for outreach with the Dept. of Aging, City of L.A. Special emphasis is placed on geriatric evaluation methods. These include thorough inpatient evaluation, outpatient assessment, and comprehensive geriatric assessments.

DESCRIPTION: Students will be responsible for the evaluation and continued care of a number of patients with respiratory diseases. They will be under the direct supervision of a pulmonary fellow and will attend daily rounds.

COURSE OBJECTIVES (in order of importance):
1. Knowledge of the pathogenesis, natural history, orderly investigation, differential diagnosis, and management of obstructive airways disease, respiratory failure, pneumonias, infiltrative lung disease, lung carcinoma, etc.
2. Interpretation of chest roentgenograms, pulmonary function tests, arterial blood gases, pleural fluid data, etc.
3. Understanding the indications for bronchoscopy, aspiration lung biopsy, thoracentesis, and pleural biopsy.
4. Knowledge of the pharmacology of bronchodilators and corticosteroids.
5. Understanding the use of mechanical ventilators.
6. Clinical skills: medical interviewing and physical examination.
7. Medical decision making: analysis of medical data and synthesis of information.
