ON-CALL SCHEDULE & WEEKEND ACTIVITIES: None

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS:

- This in-depth elective is designed for 4th year medical students with basic knowledge of Obstetrics and Gynecology. It will provide the necessary information to understand the many complex issues encountered in Reproductive Endocrinology and Infertility Services, including various androgen excess, ovulatory dysfunction, menstrual disorders, menopause, fertility counseling, and advanced reproductive technology treatment, such as in vitro fertilization and sperm microinjection.

- AVAILABLE FOR EXTERNS: Yes

- PREREQUISITES: Medicine, Surgery and Ob/Gyn

- DURATION: 3 weeks

- 2007-2008 ROTATIONS BEGIN WEEKS: 2, 5, 8, 11, 14, 17, 20, 27, 30, 33, 36, 39, 42, 45, 48

- DESCRIPTION: This in-depth elective is designed for 4th year medical students with basic knowledge of Obstetrics and Gynecology. It will provide the necessary information to understand the many complex issues encountered in Reproductive Endocrinology and Infertility Services, including various androgen excess, ovulatory dysfunction, menstrual disorders, menopause, fertility counseling, and advanced reproductive technology treatment, such as in vitro fertilization and sperm microinjection.

- COURSE OBJECTIVES (in order of importance):
  1. To gain an understanding of the basic concepts involved in reproductive endocrinology and infertility.
  2. To gain insight info on the pathophysiologic processes involved in reproductive endocrinology and infertility.
  3. To gain knowledge in the management of patients with various reproductive endocrinology disorders.
  4. To gain exposure to the various aspects of the assisted reproductive technologies including ultrasound, in vitro fertilization, ovulation induction, and intrauterine insemination.
  5. To provide an introduction to the in vitro fertilization and andrology laboratories.
  6. To become actively involved in conferences including oral presentations, case and group discussions.
  7. To provide an opportunity for research in both basic science and clinical projects.

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS:
COURSE OBJECTIVES (in order of importance)
1. Increase understanding of the effect of pregnancy on normal female physiology.
2. Gain insight into the pathophysiologic processes of pregnancy.
3. Become an active member of the obstetrical team by participating in all aspects of patient care evaluation, orders, procedures, and management planning including the management of high risk pregnancies.
4. Become proficient in the oral presentation of patients with multiple problems.
5. Gain experience in establishing a plan of management for major prenatal and intrapartum high risk conditions.
6. Gain experience in the Antenatal Testing Unit and ultrasound in the evaluation of the high risk fetus.

COMMON PROBLEMS/DISEASES
1. Diabetes Mellitus in pregnancy
2. Hypertensive disorders in pregnancy
3. Premature labor and rupture of Membrane.
4. Placental and fetal growth problems
5. Multiple gestation
6. Infectious diseases in pregnancy
7. Autoimmune disease in pregnancy
8. Cardiovascular & pulmonary

DESCRIPTION:  
This is a rotation for students who wish to deepen their knowledge of gynecology and particularly gynecologic surgery. This rotation will be in depth but broad experience on the gynecology service at our institution. The 4th year student will work both with Gynecologic Oncology service as well as with the Urogynecology service. Covering both specialty clinics and working with the team in the operating room, the student will improve their clinical diagnostic and therapeutic skills.  

COMMON PROBLEMS/DISEASES  
1. Cervical dysphasia/cancer  
2. Gynecologic malignancies (uterine, ovarian, peritoneal)  
3. Urinary incontinence  
4. Pelvic organ prolapse  
5. Abnormal uterine bleeding

STUDENTS / PERIOD: max 1 min 1  
DURATION: 3 weeks

2007-2008 ROTATIONS BEGIN WEEKS: By Arrangement

DESCRIPTION: This elective is for students who are interested in a broader view of women’s health. The goal is to direct the students’ attention to issues in women’s health (such as barriers to access to care) by caring for women who have only episodic access (Urgent Care Clinic) or access through special categorical programs (Family Planning). The full range of ages of women, from reproductive through menopausal aged women, will be cared for. Students will have primary responsibility for the assessment of the patient and the development of management plans. Students will have ongoing daily contact with faculty, fellows, and residents, and will be expected to contribute to the weekly formal didactic sessions.

STUDENT EXPERIENCES

COMMON PROBLEMS/DISEASES  
1. Abnormal vaginal bleeding  
2. Chronic Pelvic pain  
3. Early pregnancy complications
