OS295.02  ORTHOPAEDIC HAND AND MICROVAS SURGERY

Advanced Clinical Clerkship  Location: CHS  2007-2008  Revised: 12/15/06

COURSE CHAIR:  PHONE #:  COURSE OBJECTIVES (in order of importance)
Gerald A. M. Finerman, M.D.  (310) 794-7930  1.  Improve diagnostic skills of all conditions affecting the upper
FAX:  E-MAIL:  limb by evaluating inpatients and outpatients with these
problems.

SUPPORTING FACULTY:  
Neil F. Jones, M.D., Prosper Benhaim, M.D.

STUDENT COORDINATOR:  PHONE #:  
Iris Mau  (310) 206-2567
FAX:  E-MAIL: imau@mednet.ucla.edu

REPORT TO:  Externs report to Iris @ 7:30 a.m. in 72-229
CHS. UCLA students contact Iris one week before starting
the clerkship.

PREREQUISITES:  Medicine and Surgery

AVAILABLE FOR EXTERNS:  Yes

STUDENTS / PERIOD:  max 1  min 1

DURATION:  3 weeks

2007-2008 ROTATIONS BEGIN WEEKS:
2, 5, 8, 11, 14, 17, 20, 27, 30, 33, 36, 39, 42, 45, 48

DESCRIPTION:  This elective is designed for students interested in orthopaedic surgery. Students will function as subinterns, seeing patients primarily, then participating in surgery with the attending. The surgical problems are complex and include the evaluation and treatment of general hand surgery problems seen in a typical community population.

ON-CALL SCHEDULE & WEEKEND ACTIVITIES: Generally every third 24 hours. Weekend call arranged to provide one free weekend per month.

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS: Students will be assigned to one of the three general orthopaedic services whose major patient load is trauma. Exposure to the subspecialties of hand, foot, arthritis, pediatrics, sports medicine, scoliosis, spine, amputee, and foot care can be arranged if requested.
DESCRIPTION: Elective is designed for students with an interest in congenital and childhood orthopedic issues. Students will function as sub-interns seeing patients primarily, presenting them to the attending, and then participating at surgery. The problems encountered run the gamut of children's orthopedics including fractures, congenital, and developmental conditions, infection and tumors. Students will join primarily Dr. Oppenheim’s schedule, but will make rounds with the orthopedic trauma team at CHS, and may thus gain some experience with adults on this elective as well.

COURSE OBJECTIVES (in order of importance)
1. To appreciate the differences between adult and childhood skeletal elements and how these differences contribute to unique orthopedic issues in pediatrics.
2. To demonstrate a pediatric orthopedic screening exam.
3. To perform a directed examination of each of the body areas pertinent to pediatric orthopaedics with particular attention to the hip, spine, elbow and foot.
4. To demonstrate the maneuvers necessary to detect congenital hip dislocation both on the model provided as well as on infants seen in the clinic.
5. To present a differential diagnosis of limping in childhood including congenital hip dysplasia, Perthes disease, slipped capital femoral epiphysis, osteomyelitis, infection foreign body, etc. with the appropriate x-rays or imaging techniques to track down the correct choice.
6. To assess a patient for scoliosis and to be able to discuss the various treatment possibilities.
7. To recognize and institute treatment for common pediatric fractures.
8. Assess and development of a treatment program for patients with cerebral palsy.

STUDENT EXPERIENCES
COMMON PROBLEMS/DISEASES
1. Congenital hip dysplasia
2. Scoliosis
3. Slipped capital femoral epiphysis
4. Legg Perthes Disease
5. Various fractures of childhood

### On-Call Schedule & Weekend Activities
- No night or weekend duties.

### Additional Comments and Other Special Requirements:

- **Description:** This course introduces the student to the subspecialty of pediatric orthopaedic surgery. The patient population consists of children and adolescents who have chronic musculoskeletal disorders, including congenital anomalies, disturbances of normal skeletal growth, and sequelae from prior trauma and/or infection.
