AVAILABLE FOR EXTERNALS: Yes  

STUDENTS / PERIOD: max 2  min 1  

DURATION: 3 weeks  

2008-2009 ROTATIONS BEGIN WEEKS: By Arrangement  

DESCRIPTION: This elective provides the student an opportunity to assist in managing patients with plastic surgery problems at a county hospital. The student activities in this course closely parallel the daily journey of the plastic surgery resident, usually also fully trained in general surgery. The student assumes responsibilities that are appropriate in the context of this close partnership.

PREREQUISITES: Internal Medicine and Surgery

AVAILABLE FOR EXTERNS: Yes

STUDENTS / PERIOD: max 1 min 1

DURATION: 3 weeks

2007-2008 ROTATIONS BEGIN WEEKS: 2, 5, 8, 11, 14, 17, 20, 27, 30, 33, 36, 39, 42, 45, 48

DURATION: 3 weeks

DESCRIPTION: The course focuses on the many wounds seen by a busy plastic surgery service in a major county hospital. These may include decubitus ulcers, limb trauma, meningomyelocele, burns, surgical wound infections, gunshot injuries to the face, work-related hand injuries, and simple facial lacerations. The student will learn to assess and treat each and how to integrate knowledge of the individual’s underlying diseases, socioeconomic/family milieux with the wounding process. She will become familiar with bandaging and dressings, the choice of suture and needle, and the timing of suture removal. The individual will see in patients, OR, ER, and clinic patients and will gain a “soup-to-nuts” appreciation of how the body essentially heals itself. There is 1 resident on the service and 2 interns. The elective student will be placed in the front line and when on-call will generally be the first on the service to evaluate a patient. The student’s hours will stay within ACGME guidelines for resident training.

COURSE OBJECTIVES (in order of importance)

1. Gain an understanding of wound healing according to tissue wounded.
2. Describe current concepts of wound healing.
3. Describe the reconstruction ladder as it applies to wound healing.
4. Demonstrate the ability—by a full history and physical examination—to properly assess a wound and formulate a plan for its closure.
5. Apply medical evidence to support decision making—particularly with regard to timing of intervention—when planning therapy.
6. Interpret the results of tests, specifically wound culture (qualitative and quantitative), bacterial sensitivities, plain X-Rays, CT and MRI scans and indicators of nutrition; and then integrate these data in formulating the overall management of a wounded patient.
7. Perform the simple techniques of layered wound closure, skin grafting, and application of VAC devices under supervision.
8. Assist at complex surgeries for wound repair such as musculocutaneous flaps and free tissue transfer.
9. Identify the costs of managing wounds as inpatients versus outpatients with visiting nurse support.
10. Demonstrate an effective Doctor-Patient relationship.
11. Analyze the use of the health care team in caring for patients in reconstructive surgery.

STUDENT EXPERIENCES

COMMON PROBLEMS/DISEASES
1. Complex lacerations, face and hands
2. Traumatic soft tissue loss
3. Major wound dehiscence
4. Compound wounds of the lower limb
5. Decubitus ulceration
6. Gunshot injuries
7. Burns
8. Neonatal/pediatric problems

REPORT TO: Externs report to Iris @ 7:30 a.m. in 72-229
CHS. UCLA students contact Iris one week before starting
the clerkship.

PREREQUISITES: Surgery and Medicine

AVAILABLE FOR EXTERNS: Yes

STUDENTS / PERIOD: max 2 min 1

DURATION: 3 weeks

2008-2009 ROTATIONS BEGIN WEEKS:
2, 5, 8, 11, 14, 17, 20, 27, 30, 33, 36, 39, 42, 45, 48

DESCRIPTION: This rotation is primarily for students interested in pursuing a career in general surgery. It is intended to supplement (and not replace) a general surgery subinternship. Students are expected to participate in the care of surgery patients both in the hospital/clinic and the operating room. Although a formal presentation or paper is not required, students will be required to investigate and lead discussions on controversial/unusual topics. Students can participate in didactic and hands-on teaching sessions offered to the surgical house staff at the Center for Advanced Surgical and Interventional Technology (CASIT). Students are required to attend monthly journal clubs and other resident teaching conferences. Observation of other services. Services' laparoscopic cases is highly encouraged.

STUDENT EXPERIENCES

COMMON PROBLEMS/DISEASES

1. Bariatric surgery
2. Benign disorders of the biliary tract
3. Hernias: inguinal, ventral, incisional
4. Nonbariatric gastric and intestinal surgery
5. Benign & malignant colorectal disease
6. Solid organ surgery (liver, spleen, adrenal)

COURSE OBJECTIVES (in order of importance)
1. Progressive patient responsibilities with capability of evaluating and participating in the care of critically ill patients.
2. Capability of interpreting chest x-rays, pulmonary function studies, and cardiac catheterization data.
3. Familiarity with techniques for monitoring cardiopulmonary events, i.e., evaluation of CVP, pulmonary wedge pressure, and blood gases.
4. Develop an appreciation for the role of surgery in the patient with cardiac, pulmonary, esophageal, and other thoracic abnormalities.
5. Participate in operative procedures for cardiothoracic diseases and learn operative techniques.

ON-CALL SCHEDULE & WEEKEND ACTIVITIES: On call as needed.

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS:
**SU410.04 THORACIC SURGERY**

Subinternship/Inpatient  
Location: CHS  
2008-2009  
Revised: 10/8/08

**COURSE CHAIR:**  
Mary Maish, M.D. M.P.H.  
(310) 734-7333  
**E-MAIL:**

**SUPPORTING FACULTY:**  
Drs. Robert Cameron, and Carmack Holmes

**STUDENT COORDINATOR:**  
Maria Riley  
(310) 825-9820  
**E-MAIL:** mariley@mednet.ucla.edu

**REPORT TO:** Externs report to Iris @ 7:30 a.m., in room 72-229 CHS. UCLA students contact Iris one week before starting the clerkship.

**PREREQUISITES:** Internal Inpatient Medicine and Surgery

**AVAILABLE FOR EXTERNALS:** Yes

**STUDENTS / PERIOD:** max 2 min 1

**DURATION:** 3 weeks (also available for 2 or 6 wks)

**2008-2009 ROTATIONS BEGIN WEEKS:**  
2, 5, 8, 11, 14, 17, 20, 27, 30, 33, 36, 39, 42, 45, 48

**DESCRIPTION:** This elective provides an opportunity to actively participate in the care of patients who have disease confined to the thoracic cavity. The focus is on benign and malignant processes of the lung, esophagus and mediastinum. The clinical exposure will be comprehensive and will include exposure to the outpatient clinics as well as the postoperative care of the surgical patient in the ICU and ward. The clinical exposure will be supported by didactic lectures and teaching sessions with the surgical faculty. Students will be encouraged to participate in a research effort during the course of the rotation, and be expected to give a short oral presentation on a topic in thoracic surgery.

ON-CALL SCHEDULE & WEEKEND ACTIVITIES: Call schedule: Every fourth night. Required conferences—Surgery Grand Rounds, 8:30 – 10:00 a.m., Saturday. 

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS: 

DESCRIPTION: This elective will give the student the opportunity to participate, as a subintern, in the care of the general surgical patient. The student should choose between working two weeks on two of the services, which is preferred, (including vascular, colorectal, GI, oncology, and trauma-critical care) or four weeks on any one service, pending availability. You will function as a subintern, taking care of patients particularly assigned to you. In-house call one night in four, including weekends.

2, 5, 8, 11, 14, 17, 20, 27, 30, 33, 36, 39, 42, 45, 48

**DESCRIPTION:**
This sub-internship is intended to provide the student with in-depth knowledge of surgical critical care as it relates to trauma and non-trauma emergency surgical diseases. The student is expected to function at the level of an intern by managing critically ill patients with close follow-up of their progression on a daily basis. In addition, the student is involved in formal daily bedside presentations, weekly journal club presentations, and case presentations, which are all teaching sessions.

E-MAIL: imau@mednet.ucla.edu

DESCRIPTION: This elective provides an excellent opportunity to learn about and manage adult and pediatric patients with liver failure in the critical care and acute care settings. In addition, this elective allows the student to experience the problems and complexity of transplantation. The student is responsible, under proper guidance, for managing patients with liver failure from the initial evaluation through the transplant operation and into the post-operative period. The student will be expected to participate in donor, recipient, and elective transplant and hepatobiliary surgeries, assist with the management of adult and pediatric pre- and post-transplant patients, and give an oral case presentation at the conclusion of the rotation.

COURSE OBJECTIVES (in order of importance)
1. Knowledge of the pathogenesis, natural history, diagnosis and management of patients with acute and chronic liver failure.
3. Participation in operative procedures, including all aspects of the liver transplant.
4. Knowledge and insight into the immunological problems of transplantation (i.e., rejection).
5. Diagnosis and management of the complications associated with liver transplantation.
6. Ability to examine and cost effectively evaluate patients with liver failure.
7. Knowledge and experience in managing critical care patients.
8. Awareness of the indications for liver transplantation.
10. Exposure to a multidisciplinary approach in the care and management of the transplant patient.

STUDENT EXPERIENCES

COMMON PROBLEMS/DISEASES
1. Chronic liver failure
2. Acute liver failure
3. Immunosuppressed patients
4. Multiorgan failure
5. Hepatic tumors
6. Portal hypertension
7. Biliary problems
8. Opportunistic infections

INPATIENT: 90%
OUTPATIENT: 10%
CONSULTATION: 0%
PRIMARY CARE: 100%
