COURSE OBJECTIVES (in order of importance)

1. Management of the airway — control of airway with mask, tracheal intubation.
2. Familiarize students with the principles and technique of general and regional anesthesia.
3. Preoperative evaluation of patients for anesthesia.
4. Anesthesia for general surgery and the surgical sub-specialty i.e., cardiac, neuro, ENT, ophthalmologic orthopedic, and urologic.
5. Establishing lines: IV lines.
6. Preoperative fluid management.
7. Pharmacology of anesthetic drugs: IV agents, inhalation agents, muscle relaxants.
8. Student may go to codes with supervising personnel if he or she wishes.

COURSE OBJECTIVES (in order of importance)

1. Knowledge of the timing and role of surgery for coronary and valvular heart disease.
2. History and physical examination of patients with coronary artery disease or valvular heart disease.
3. Evaluation of specialized cardiac tests that are of importance for patients being assessed for open-heart surgery. (CXR, EKG, echocardiograms, nuclear scintigrams, coronary angiograms, and cardiac catheterization data).
4. Medical judgment, analysis of medical data, and synthesis of information in the preoperative patient.
5. The care of patients in the early postoperative period, with emphasis on low cardiac outpatient state, pulmonary insufficiency, tamponade, and arrhythmias.
6. Diagnosis and treatment of various arrhythmias.
7. Knowledge of drugs: digitalis preparations, procainamide, inotropes, vasodilators, quinidine, lidocaine, amiodarone, beta blockers, calcium channel blockers, and other cardiotoxic agents.
8. Oral presentations.

DESCRIPTION: This is an intensive care unit-based service that focuses on the medical management of the open heart surgery patient. Students also have the opportunity to observe and scrub in on cardiac surgery cases. This is a practical rotation for students. They will benefit by a close association with full-time faculty, cardiology fellows, and cardiac surgeons throughout each day. The primary emphasis will be on hands-on patient care and procedures with in-depth consideration of physical findings and ancillary laboratory testing. Students attend two daily lectures on EKG interpretation and on general cardiology topics.
