**APPROXIMATE # OF PATIENTS EVALUATED EACH WEEK BY STUDENT:** 4

**TOTAL # OF PATIENTS EVALUATED EACH WEEK BY ENTIRE SERVICE:** 25

**DESCRIPTION:** This course is an introduction to gastrointestinal and liver diseases. Students will perform consultations, discuss patients at rounds, have didactic sessions and will be able to observe GI disorders.

**COURSE OBJECTIVES (in order of importance)**

1. Knowledge of the pathogenesis and pathophysiology of common GI diseases.
2. Practical experience in the orderly evaluation and problem orientation of hospitalized patients referred for GI consultation, responding to the consultation request.
3. Knowledge of the principles of management of common GI problems with practical application of physiologic principles in a patient-oriented setting and active participation in follow-up care.
4. Familiarity with the histopathology and radiologic abnormalities of GI diseases.
5. Familiarity with GI endoscopic procedures (sigmoidoscopy, biopsy, gastroscopy, ERCP, colonoscopy, polypectomy), endoscopic findings, and the indications for endoscopy.
6. Experience with critical literature review in gastroenterology.

### ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS:
The student will be consulted in an attempt to tailor this experience as much as possible to his or her individual needs. The above description is what has been usually requested.
COURSE OBJECTIVES (in order of importance)
1. Diagnosis and management of oncologic and hematologic disorders, infection in the compromised host, the bleeding patient, psycho-social aspects of the cancer patient and family.
2. Understanding of the pathologic processes involved in anemias, thrombocytopenias, platelet dysfunctions, coagulopathies, myeloproliferative syndromes.
3. Diagnosis and treatment of hematologic malignancies.
4. Diagnosis and treatment of a variety of solid tumors.
5. Interpretation of peripheral blood smears, bone marrows, coagulation tests.
7. Learning how to make succinct and comprehensive oral presentations.
8. Improving the doctor/patient relationship.
9. Learning interpretation of the literature and principles of library research and analysis of medical data.

STUDENT EXPERIENCES

6. Myeloma
7. Breast CA
8. Polycythemia

APPROXIMATE # OF PATIENTS EVALUATED EACH WEEK BY STUDENT: 5 - 8
TOTAL # OF PATIENTS EVALUATED EACH WEEK BY ENTIRE SERVICE: 30

DESCRIPTION: The student will participate on the Hematology/Oncology consult service at primarily OVMC. This will include the work-up and evaluation of inpatients as well as extensive participation in the management of outpatients with cancer and blood disorders. Teaching sessions with Attendings will occur in both settings, as well as through weekly conferences and lectures.

STUDENT OBJECTIVES (in order of importance)
1. Knowledge of the natural history, clinical and diagnostic evaluation of common hematologic and neoplastic disorders, e.g., anemia, leukemia, ITP, breast cancer, colon cancer, lung cancer.
2. Knowledge of the etiology and pathogenesis of malignant transformation.
3. Improved ability to evaluate peripheral blood smears and bone marrows.
4. Improved history and physical examination.
5. Medical judgment, analysis of medical data, and synthesis of information.
6. Interpretation of biopsy materials, radiographic studies, and other staging procedures.
7. Medical record keeping, e.g., data collection and recording, flow sheets, review of past records, appropriate format for outpatient records, and in-patient consultations.
8. Knowledge of commonly used chemotherapeutic agents and their toxicities.
9. Psychosocial problems and their management, including pain management and hospice care.
10. Focused literature research and faculty tutorial on single topic selected by student(s).
11. Diagnosis and management of common oncologic emergencies, e.g., neutropenic sepsis, hypercalcemia, cord compression syndrome.

REPORT TO:
Infectious Disease Division Office, Bldg. 500, Room 4669, West LA VA Medical Center

PREREQUISITES: Third-year clerkship in Internal Medicine

AVAILABLE FOR EXTERNALS: Yes

STUDENTS / PERIOD: max 2 min 1

DURATION: 3 weeks

2010-2011 ROTATIONS BEGIN WEEKS:
3, 6, 9, 12, 15, 18, 21, 27, 30, 33, 36, 39, 42, 45, 48

DESCRIPTION: The goal of the Infectious Disease faculty is to provide the student with the opportunity to be the primary evaluator of patients with a broad spectrum of common infections and to formulate a diagnostic and therapeutic plan; these are then discussed and a rational approach to the patient's illness is formulated. There is also emphasis on appropriate use of antibiotics.

ON-CALL SCHEDULE & WEEKEND ACTIVITIES: None

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS: Course recommended for students who plan to do residencies in adult medicine (either Internal Medicine, Family Practice, Surgery, or Surgical subspecialties). Course emphasizes learning to manage most of the common (but sometimes difficult) types of infection that may be seen in clinical practice. ID Journal Club meets twice a month. ID Research Conference meets once a month.

ON-CALL SCHEDULE & WEEKEND ACTIVITIES: Weekends off

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS: The work-up of an infectious disease problem sharpens clinical skills in that it involves rigorous examination of the patient's complete medical condition. The question most commonly asked of us is: "What antibiotic should I use?" But the question that we ask ourselves is: "What is the disease?"

(310) 267-0443
E-MAIL: afrazier@mednet.ucla.edu

REPORT TO:
Dr. Christopher B. Cooper, 37-131 UCLA (Pulmonary Div. Office)

PREREQUISITES: Medicine and Surgery

AVAILABLE FOR EXTERNALS: Yes

STUDENTS PERIOD: max 50 min 6

DURATION: 3 weeks

2010-2011 ROTATIONS BEGIN WEEKS:
12, 30

DESCRIPTION: The combined objectives of this course aim to refine diagnostic skills so that the student can develop a focused differential diagnosis based on recognition of physical findings, laboratory or radiographic features. Each morning will commence with a review of 20 clinical slides showing characteristic physical findings. Differential diagnosis will be discussed. Examination of the four major organ systems will be demonstrated by one of the faculty with emphasis on refinement of examination technique to increase its value. Then students will encounter patients with abnormal physical findings and have the opportunity to refine and demonstrate their examination techniques.

STUDENT OBJECTIVES (in order of importance)
1. Appreciate the important roles of careful history taking and a refined physical examination in developing a focused differential diagnosis.
2. Appreciate the impact of a succinct and accurate differential diagnosis on the complexity, efficacy, complications and costs of patient management.
3. Review and recognize about 160 color slides of clinical cases showing important diagnostic features.
4. Review, in depth, the approach to physical examination of each of four organ systems (respiratory, cardiovascular, gastrointestinal and neurological).
5. Refine these examination skills in selected outpatients with classic physical findings.
6. Identify abnormal physical findings in patients who are admitted at the time of the course.
7. Review and recognize important diagnostic skills in radiology.
8. Self-assessment of diagnostic skills though clinical slide quiz.

ON-CALL SCHEDULE & WEEKEND ACTIVITIES: None

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS: Procedures begin between 8:00 to 8:30 am and usually wind down after 5:00 pm Monday through Friday. In addition to developing the technical skill required for procedures, there is a heavy emphasis on understanding anatomy, indications and contraindications of procedures, and trouble-shooting catheter related issues. Please bear in mind that the Procedure Center/PICC Service workload rests on the attendings' shoulders and students rotating on the service should not feel they are on service as a labor source.

REPORT TO:
West Los Angeles VA Medical Center, Bldg. 500, Room 1419, 8:00 a.m.

PREREQUISITES: MS IV only

AVAILABLE FOR EXTERNS: Yes

STUDENTS / PERIOD: max 3 min 1

DURATION: 3 weeks

2010-2011 ROTATIONS BEGIN WEEKS:
By Arrangement

DESCRIPTION: This clerkship provides an introduction to PM&R through supervised clinical experience. Patients will be examined and treatment programs carried out under supervision of the Rehabilitation Medicine Staff. An introduction to Electromyography, brace, prosthetic and wheelchair prescriptions, and cardiac rehabilitation are all included.

COURSE OBJECTIVES (in order of importance)
1. Clinical skill in history taking and physical examination.
2. Knowledge of disease process in stroke, amputation, low back and other musculoskeletal, neuromuscular, and chronic pain syndrome.
3. Medical judgment in management of the disabled patient.
4. Utilization of the health care team.
5. Functional evaluation.
6. Interpretation of tests: Electromyography, bone and joint x-rays.
7. Basic science: principles of physiology and anatomy correlated with clinical problems.
