REPORT TO: Externs report to Iris @ 7:30 a.m. in 72-229. UCLA students contact Iris one week before starting the clerkship.  

PREREQUISITES: Medicine and Surgery  

AVAILABLE FOR EXterns: Yes  

STUDENTS / PERIOD: max 1 min 1  

DURATION: 3 weeks  

2009-2010 ROTATIONS BEGIN WEEKS:  
2, 5, 8, 11, 14, 17, 20, 27, 30, 33, 36, 39, 42, 45, 48  

DESCRIPTION: This elective is designed for students interested in orthopaedic surgery. Students will function as subinterns, seeing patients primarily, then participating in surgery with the attending. The surgical problems are complex and include the evaluation and treatment of general hand surgery problems seen in a typical community population.  

COURSE OBJECTIVES (in order of importance):  
1. Improve diagnostic skills of all conditions affecting the upper limb by evaluating inpatients and outpatients with these problems.  
2. Improve understanding of upper limb anatomy by self-directed dissections.  
3. Develop judgment for treatment by participating in discussions for formulation of care.  
4. Improve interpretation of laboratory data, including radiographs and nerve conduction studies.  
5. Develop awareness of available literature for further reference.  

STUDENT EXPERIENCES  
COMMON PROBLEMS/DISEASES  
1. Hand injuries  
2. Reconstructive hand surgery  
3. Rheumatoid reconstruction  
4. Infections  
5. Carpal tunnel syndrome  
6. Dupuytren’s contracture  
7. Congenital anomalies  
8. Microsurgical reconstruction  

INPATIENT: 5%  
OUTPATIENT: 95%

DESCRIPTION: Elective is designed for students with an interest in congenital and childhood orthopedic issues. Students will function as sub-interns seeing patients primarily, presenting them to the attending, and then participating at surgery. The problems encountered run the gamut of children’s orthopaedics including fractures, congenital, and developmental conditions, infection and tumors. Students will join primarily Dr. Oppenheim’s schedule, but will make rounds with the orthopaedic trauma team at UCLA, and may thus gain some experience with adults on this elective as well.  
STUDENT EXPERIENCES

ON-CALL SCHEDULE & WEEKEND ACTIVITIES: Wednesday: 9:00 –10:00 a.m. Orthopaedic grand rounds (once a month). Call to be shared with resident.  
ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS: The elective utilizes the Orthopaedic Clinics at UCLA. The majority of the student’s time will be spent working closely with Dr. Oppenheim and residents. Please note: If there is no Peds Ortho clinic or OR scheduled for the day, the student will be assigned to one of the other Ortho services. You can contact Dr. Oppenheim on your first day to arrange your weekly schedule.
COURSE OBJECTIVES (in order of importance)

1. Provide an intensive operative and clinical experience in adult reconstructive surgery of the knee and hip geared for student interested in or contemplating a career in orthopaedic surgery.

2. Provide student with a sufficient outpatient clinical experience to allow consistent diagnosis of osteoarthritis, post-traumatic arthritis, and inflammatory arthritis affecting hip and knee.

3. Provide an understanding of the pathophysiology of degenerative joint disease, the conservative treatment measures, the non-arthroplasty treatment options, and the indications for hip and knee replacement surgery.

4. Provide an understanding of the common mode of prosthetic failures and how to differentiate between aseptic and septic failure mechanisms.

5. Provide a basic understanding of intra-operative infection prevention and the basic surgical steps and concepts in hip and knee replacement surgery.

6. Provide basic surgical skills (make an incision, suture, and make a saw cut)

7. Provide opportunity to function as surgical intern

COMMON PROBLEMS/DISEASES

1. Osteoarthritis
2. Post-traumatic degenerative joint disease of hip & knee
3. Inflammatory Arthritis
4. Indications for joint replacement surgery
5. Failed joint replacement surgeries

2009-2010 ROTATIONS BEGIN WEEKS:  
2, 5, 8, 11, 14, 17, 20, 27, 30, 33, 36, 39, 42, 45, 48

DESCRIPTION:  This course introduces the student to the subspecialty of pediatric orthopaedic surgery. The patient population consists of children and adolescents who have chronic musculoskeletal disorders, including congenital anomalies, disturbances of normal skeletal growth, and sequelae from prior trauma and/or infection.

COURSE OBJECTIVES (in order of importance)
1. To improve pertinent history taking, child evaluation, and decision making in both inpatient and outpatient settings.
2. To perform a basic orthopedic evaluation including appropriate history taking and physical exam.
3. To attend outpatient specialty clinics and teaching conferences
4. To understand the diagnosis, treatment, and basis for referral of common pediatric orthopaedic disorders
5. To observe an array of pediatric orthopaedic surgical procedures.

COMMON PROBLEMS/DISEASES
1. clubfoot
2. developmental dislocation/dysplasia of the hip
3. scoliosis
4. spina bifida
5. cerebral palsy
6. limb length discrepancy
7. congenital hand anomalies
8. arthrogryposis
