ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS:

No on-call schedule for nights and weekends. It is expected students will learn the approach to the oliguric patient, the work-up of acute & chronic renal failure, and appropriate management of the approach & treatment of hypertension & how to evaluate and manage acid-base & fluid & electrolyte disorders. The student will also have exposure to peritoneal and hemodialysis, as well as Continuous Ambulatory Peritoneal Dialysis (CAPD). The outpatient experience is designed to familiarize the student w/ the longitudinal course of renal disease and offer a more practical approach to diagnosis and management of problems in Nephrology.

STUDENTS / PERIOD: max 2 min 1

DURATION: 3 weeks

2011-2012 ROTATIONS BEGIN WEEKS:
3, 6, 9, 12, 15, 18, 21, 27, 30, 33, 36, 39, 42, 45, 48

DESCRIPTION:
The Nephrology Service welcomes students to its clerkship program.  We see patients with a wide variety of acute and chronic renal diseases. The students’ responsibilities will include seeing in- and outpatient consultations and follow-up care with renal fellows and staff physicians, participation in informal conferences, teaching rounds, work rounds, and seminars. The option to attend other subspecialty conferences will be part of the student’s experience.

COURSE OBJECTIVES (in order of importance)
1. Diagnosis and management of complex in- and out-patient problems related to acute and chronic renal disease.
2. Experience with patients on chronic hemodialysis and peritoneal dialysis.
4. Interpretation of test involved in the management of kidney disease such as Renal Ultrasound, IVP, Kidney Biopsy, ABG, and Chemistry Panels.
5. Indication and complication of Hemodialysis, Peritoneal Dialysis, and Hemofiltration.
6. Deliver concise oral presentations and be able to formulate consultations in a concise written format.

COMMON PROBLEMS/DISEASES
1. Acute renal failure
2. Chronic renal failure
3. Hemodialysis problems
4. Peritoneal dialysis problems
5. Hypertension
6. Proteinuria
7. Fluid and electrolyte imbalance
8. Acid/base imbalance

COMMON PROBLEMS/DISEASES
INPATIENT: 90%
OUTPATIENT: 10%
CONSULTATION: 100%
PRIMARY CARE: 0%

DESCRIPTION: This elective is structured around a busy consultation service, which is staffed by two pulmonary fellows, a medical resident, and an attending. The integration of medical, surgical, radiologic, pathologic, and physiologic features of lung disease is stressed at a weekly interdisciplinary Chest Conference staffed by faculty from these disciplines. The TB Conference addresses practical and theoretic issues in the current management of TB, MDR-TB with and without HIV infection.

AVAILABLE FOR EXTERNALS:  Yes

STUDENTS / PERIOD:  max 1 min 1

DURATION:  2 weeks

2011-2012 ROTATIONS BEGIN WEEKS:
By Arrangement

DESCRIPTION:  The student will work one-on-one with a busy pulmonary-critical specialist whose practice is divided between a large teaching hospital (Cedars-Sinai) and a private office setting. The student will be exposed to the entire spectrum of pulmonary diseases and critical care problems. There will be emphasis on performing histories and physicals as well as developing differential diagnoses and appropriate diagnostic and therapeutic plans. The student can participate in invasive procedures such as fiberoptic bronchoscopy, endotracheal intubation and thoracentesis. The student will learn how to interact with patients and families frequently in serious, life-threatening situations. The student will be expected to do in-depth reading about the patients he/she sees and review various other topics such as pulmonary physiology.

DESCRIPTION:  Students evaluate and follow one to three inpatients for presentation to the attending staff during consultation rounds 5 days/week. During patient clinics, students evaluate the full spectrum of common and uncommon rheumatic diseases and present to the staff, 6 – 12 patients per week. Supervision and small-group teaching is provided by medical residents, subspecialty fellows, and the staff. Conferences and lectures in rheumatology, orthopaedics, allergy and radiology complete the program.

ON-CALL SCHEDULE & WEEKEND ACTIVITIES:

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS:

DESCRIPTION: Students will be taught methods of rheumatologic diagnosis and treatment in both inpatient and outpatient settings, utilizing patients of the Division of Rheumatology in the UCLA Hospital wards, clinics and Internal Medicine Subspeciality Practice. Education in the role of genetics and the immune system in autoimmunity is offered in four weekly conferences.

STUDENT COORDINATOR:
Weiling Chen
(310) 825-7992
E-MAIL: wchen@mednet.ucla.edu

REPORT TO: (Contact Coordinator for Clinic Location)
(WW) Dr. Alan Gom—200 Medical Plaza, 3rd floor, Suite 365B
(SM) Dr. Mihaela Taylor—1304 15th Street, Suite 213, SM

COLLEGE AFFILIATION: Academic Medicine

AVAILABLE FOR EXTERNALS: Yes

STUDENTS / PERIOD: max 2 min 1

DURATION: 3 weeks

2011-2012 ROTATIONS BEGIN WEEKS:
By Arrangement

COURSE OBJECTIVES (in order of importance)
1. Knowledge of the pathogenesis and natural history, the orderly investigation, differential diagnosis, and management of autoimmune collagen diseases and arthritis.
2. The knowledge of the pharmacology of aspirin, non-steroidal anti-inflammatory drugs, INF inhibitor, anti-CD 20, CTLA and corticosteroids, cytotoxics Ig, methotrexate, and new biologic agents.
3. Medical interviewing and physical examination of muscles, joints and all rheumatic disease manifestations (skin, neurologic, cardiac, etc.).
4. Analysis of medical data and synthesis of information regarding autoimmune and rheumatic diseases, including both simple and complex diagnostic problems.
5. Interpretation of serologic studies for SLE, RA, sateraderma, etc.
7. Written and dictated rheumatology consultations.
8. Procedures such as: joint aspiration and injection, soft tissue injection.
10. Common rheumatic and immune diseases, including rheumatoid arthritis, osteoarthritis, systemic lupus erythematosus, scleroderma, and gout.

CLOSE CONTACT WITH:

1. Knowledge of the component parts and basic principles of Nuclear Medicine with emphasis on diagnostic clinical applications by planar, SPECT, and PET/CT imaging.
2. Clinical interpretation of imaging studies including brain, thyroid, lung, heart, liver, gallbladder, spleen, kidney, clot localization, abscess, and tumor detection and staging.
4. Basic physics of radiation, scintillation counting, and imaging plus recent developments in instrumentation.
5. Principles of radioimmunoassay including sensitivity, specificity, dose response curve and clinical applications.
7. Principles of computers, programming, and clinical applications with emphasis on cardiovascular Nuclear Medicine.

6. Musculoskeletal Injuries, rashes, developmental delay (Pediatrics)

APPROXIMATE # OF PATIENTS EVALUATED EACH WEEK BY STUDENT: 40
TOTAL # OF PATIENTS EVALUATED EACH WEEK BY ENTIRE SERVICE: 100

DESCRIPTION: This elective will give students exposure to an academic based internal medicine/pediatrics primary care practice. The majority of time will be spent in our Santa Monica practice seeing a wide variety of adult and pediatric patients both for well care as well as urgent visits. Students are expected to see patients independently, generate differential diagnoses and begin implementing plans which can then be followed up as the rotation progresses. It is expected that students will take ownership of the patients they see and follow up any tests ordered and discuss the results with the attendings and contact the patients with the results. Interested students can also spend 2 half days per week at our Simms Mann Med/Peds clinic again working with a wide variety of children and adults but with a focus on caring for the underserved and practicing cost effective medicine in a system with limited resources.
