ON-CALL SCHEDULE & WEEKEND ACTIVITIES: One evening per week in the Psych. ER

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS: Additional opportunities include participation in group and family therapy sessions as well as chances to attend mental health court to observe court testimony and forensic psychiatric evaluations. There is a focus upon diagnostic workups and biological interventions within a psychosocial and sociocultural framework. The psychiatry modules are richly staffed inpatient units with a multidisciplinary team, including attending psychiatrist, two psychiatric residents, and a full complement of nursing, psychology, social work and occupational therapy staff.

DESCRIPTION: This is an excellent opportunity to experience a multidisciplinary, integrated approach to the care of psychiatric patients. Non-UCLA externs may elect to participate for periods greater than three weeks as conforms with your institution’s schedule. The South Unit is a 14-bed unit with length of stay approximately 7-10 days. There is also a 24-bed unit on 8 West with the same 7-10 days length of stay. Students electing this advanced clerkship will be assigned to a specific team, and will have an opportunity to work independently with patients suffering from a wide variety of psychiatric disorders under direct supervision of the attending. (Please see additional comments below.)

DESCRIPTION: The UCLA Consultation & Liaison Service is an inpatient consultation psychiatry service that provides psychiatric evaluations to the Ronald Reagan UCLA Medical Center. The service provides focused consultations to medical and surgical services for urgent and routine matters. The service consists of 3–4 resident physicians, a psychologist, a psychiatric social worker and multiple faculty members with expertise in various aspects of Consultation/Liaison Psychiatry. The service also provides consultations to the Emergency Medical Center that is a major trauma center for large urban hospital. The scope services includes capacity to consent to or refuse medical treatment, pain management, pre-surgical evaluation for solid organ transplant candidates, post-operative follow-ups for acute behavioral disturbances, mood and anxiety disorders in a teaching hospital.

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS:
COURSE OBJECTIVES (in order of importance)
1. Signs and symptoms, differential diagnosis, psychodynamics, psychophysiology, epidemiology, and psychiatric behavioral "conditions" most commonly encountered in medical settings.
2. Indications, contraindications, dosage, and side effects of psychotropic medications for conditions described above.
3. Describe indications and contraindications for nonpharmacological treatment of conditions described above, including: (a) Individual, long-term psychotherapy; (b) Family Therapy; (c) Crisis Intervention; (d) Intervention by non-psychiatric medical personnel; (e) Behavior therapy; (f) Cognitive Therapy. (g) Relaxation Training; (h) Interpersonal and insight-oriented therapy.
4. Demonstrate ability to collect information from the patient, from the medical chart, from the referring physician, and from relevant other sources. Developing psychiatric interviewing skills specific to the medical ambulatory consultation setting.
5. Describe influence of psychological and social variables on the predisposition, onset, course, and outcome of "somatic" illness.
6. Describe common patterns of psychological and social adaptation to illness.

ON-CALL SCHEDULE & WEEKEND ACTIVITIES: Once per week. Optional.

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS:
DESCRIPTION: The Psychosomatic Medicine / C&L service at Olive View-UCLA Medical Center provides inpatient psychiatric evaluations to Medical, Surgical, Pediatrics and Ob/Gyn departments. The scope of services include psychiatric diagnostic evaluations using biopsychosocial approach; management of agitation and behavioral problems; treatment of anxiety, mood disorders and psychosis; capacity evaluations, and provide assistance to primary medical teams to apply for power 3200 and probate conservatorship. HIV Psychiatry Clinic provides biopsychosocial evaluations and treatment to patients with HIV/AIDS and co-morbid psychiatric disorders. Also assess suicide risk in newly diagnosed HIV patients and provide psycho education and supportive therapy to patients.

COURSE OBJECTIVES (in order of importance)
1. Expose students to a wide range of neuropsychiatry presentations in medical surgical patients
2. Teach concise interviewing skills and differential diagnostic formulation.
3. Examine the impact of illness, hospitalization and medical care on the psychological functioning of patients
4. Educate students about the role of psychiatric, psychological, and behavioral factors in the pathogenesis of medical disorders
5. Promote liaison relations with medical and surgical services, with a particular focus on primary care, that emphasizes awareness, assessment, and management of mental disorders in medical patients.
6. Demonstrate appropriate approaches to the execution of a psychiatry consultation, with emphasis on assessment techniques unique to the consultation setting, the nature of communication with the consulted and the responsibilities and limitations of the consultant.
7. Demonstrate a variety of interventions and therapies relevant to medically ill patients, including time-effective psychotherapy, somatic therapies, behavioral techniques, liaison methods, and multidisciplinary team approaches.
8. Demonstrate understanding of concepts of substituted judgment and power 3200 for court appointed surrogate decision maker.
9. Gain experience in diagnosis of Dementia and assessment for Probate Conservatorship
10. Understand the concepts of law and medical ethics as it applies to C&L Psychiatry.

DESCRIPTION:  The clinical focus of the Schizophrenia Treatment Unit is on the management of inpatient veterans with psychotic disor-
orders, typically refractory schizophrenia. Clinical interventions including psychopharmacology, group therapy, and supportive individual
therapy. We also treat a variety of major mental illnesses including bipolar disorder, major depression, PTSD, and substance abuse.
Sub-interns will be assigned a caseload of patients and assume primary responsibility of their clinical management. Opportunities will
also be available for involvement in clinical research and exposure to outpatient treatment.

TYPICAL WEEKLY SCHEDULE

ON-CALL SCHEDULE & WEEKEND ACTIVITIES: None scheduled.

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS: Students may elect to spend three or four weeks in our program. Four weeks are recommended.
This elective provides an overview of how to identify and manage patients with substance use disorders. Students will function as a sub-intern on the inpatient substance abuse service. Duties will include care of patients admitted for detoxification, management of co-occurring psychiatric disorders and assisting in developing an aftercare program. Students will also participate in the outpatient, Addiction Medicine Clinic to learn techniques of psychopharmacological management of addictive disorders. Finally, students will visit residential treatment facilities, sober living homes and drug courts to gain a full appreciation of the clinical management of patients with substance use disorders.
