COURSE OBJECTIVES (in order of importance)
1. Knowledge in the assessment of plastic surgery related deformities.
2. Knowledge in the possibilities of reconstruction.
4. Knowledge regarding the management of cutaneous malignancies.
5. Knowledge in the assessment of functional deformities of the hand.
6. Practice in the care of traumatic and surgical wounds, with emphasis on proper tissue handling and wound closure.
7. Practice in obtaining history and physical for patients with plastic surgical problems, to have the opportunity to first-hand evaluate functional and aesthetic deformities.
8. Knowledge regarding the various aspects of superficial anatomy, especially the hand and the face.
9. Knowledge regarding the evaluation and management of various facial injuries, including fractures.
10. Observance of evaluation and team approach for facial cleft deformities.

DESCRIPTION:
This sub-internship is intended to provide the student with in-depth knowledge of general surgery and weight loss surgery using minimally invasive techniques. The student is expected to function at the level of an intern, including pre-operative assessment of patient in the clinic setting, participation in the operating room and post-operative care of the patient either in the intensive care unit or on the wards. In addition, the student is involved in formal bedside presentations, journal club presentations, and case presentations, which are teaching sessions that are held weekly or bi-weekly.

2010-2011 ROTATIONS BEGIN WEEKS:
3, 6, 9, 12, 15, 18, 21, 27, 30, 33, 36, 39, 42, 45, 48

STUDENT EXPERIENCES

1. Take an accurate, focused patient history as it relates to the surgical disease process
2. Ability to perform a focused physical exam
3. Ability to concisely make a patient presentation at the bedside and in the clinic setting
4. Knowledge of common presentations of gastro-esophageal reflux disorder
5. Knowledge of chronic medical problems associated with obesity
6. Knowledge of common presentations of pheochromocytoma and other adrenal disorders
7. Knowledge of precipitating factors for developing hernias and risk factors associated with hernia surgery
8. Knowledge of indications and contraindications of minimally invasive surgery
9. Knowledge of indications and contraindications to weight loss surgery
10. Knowledge of appropriate use of imaging modalities, such as plain x-ray, ultrasound, MRI, CT scan, nuclear medical scan to diagnose or follow-up on common solid organ disorders
11. Knowledge of abdominal anatomy
12. Knowledge of inguinal anatomy

3, 6, 9, 12, 15, 18, 21, 27, 30, 33, 36, 39, 42, 45, 48

DESCRIPTION:
This elective provides an opportunity to participate actively in the care of both pediatric and adult cardiac patients, as well as those with lung, esophageal, mediastinal diseases. This clinical exposure will be enhanced by didactic lectures and teaching sessions with the surgical faculty.

COURSE OBJECTIVES (in order of importance)
1. Progressive patient responsibilities with capability of evaluating and participating in the care of critically ill patients.
2. Capability of interpreting chest x-rays, pulmonary function studies, and cardiac catheterization data.
3. Familiarity with techniques for monitoring cardiopulmonary events, i.e., evaluation of CVP, pulmonary wedge pressure, and blood gases.
4. Develop an appreciation for the role of surgery in the patient with cardiac, pulmonary, esophageal, and other thoracic abnormalities.
5. Participate in operative procedures for cardiothoracic diseases and learn operative techniques.

REPORT TO: Harbor-UCLA, 3WICU, report to the Surgical 

PREREQUISITES: Inpatient Surgery 

AVAILABLE FOR EXTERNALS: Yes 

STUDENTS / PERIOD: max 2 min 1 

DURATION: 3 weeks 

2010-2011 ROTATIONS BEGIN WEEKS: 3, 6, 9, 12, 15, 18, 21, 27, 30, 33, 36, 39, 42, 45, 48 

DESCRIPTION: Students will receive an intense overview of surgical and trauma-related diseases in the Surgical Intensive Care Unit at Harbor-UCLA. Basic critical care principles such as management of brain trauma, sedation, and analgesia, ventilator management, hemodynamic support, acid/base, fluids and electrolytes, surgical nutrition, and sepsis/organ dysfunction will be emphasized. Students will have a hands-on experience by actively evaluating and managing new patients, performing bedside procedures such as flexible bronchoscopy, chest tubes, and central line insertions with supervision, participating in daily rounds with faculty, and giving an oral presentation at the end of the rotation during the Trauma/Critical Care Conference. 

STUDENT EXPERIENCES 

COMMON PROBLEMS/DISEASES 
1. Multisystem trauma 
2. Septic shock/severe sepsis 
3. Acute respiratory failure 
4. Hypovolemic shock 
5. Acute renal insufficiency 
6. Myocardial infarction 
7. Damage control surgery 
8. Ischemic bowel

**ON-CALL SCHEDULE & WEEKEND ACTIVITIES:** Call schedule: Every fourth night. Required conferences—Surgery Grand Rounds, 8:30 – 10:00 a.m., Saturday.

**ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS:**

This elective will give the student the opportunity to participate, as a subintern, in the care of the general surgical patient. The student should choose between working two weeks on two of the services, which is preferred, (including vascular, colorectal, GI, oncology, and trauma-critical care) or four weeks on any one service, pending availability. You will function as a subintern, taking care of patients particularly assigned to you. In-house call one night in four, including weekends.

**PREREQUISITES:** Surgery, Medicine

**AVAILABLE FOR EXternS:** Yes

**STUDENTS / PERIOD:** max 8 min 1

**DURATION:** 3 weeks

**2010-2011 ROTATIONS BEGIN WEEKS:**
- 3, 6, 9, 12, 15, 18, 21, 27, 30, 33, 36, 39, 42, 45, 48

**STUDENT COORDINATOR:** Teresa Scanlon  
**PHONE #:** (310) 222-2795

**REPORT TO:** Dept. of Surgery, 3 East, Room 36, 8:30 a.m.
**Description:** This sub-internship is intended to provide the student with in-depth knowledge of surgical critical care as it relates to trauma and non-trauma emergency surgical diseases. The student is expected to function at the level of an intern by managing critically ill patients with close follow-up of their progression on a daily basis. In addition, the student is involved in formal daily bedside presentations, weekly journal club presentations, and case presentations, which are all teaching sessions.

**Common Problems/Diseases:**
1. Shock
2. Sepsis
3. Acute respiratory distress syndrome
4. Ventilator-associated pneumonia
5. Multi-system organ failure
6. Respiratory failure
7. Multi-system trauma

ON-CALL SCHEDULE & WEEKEND ACTIVITIES: On call every third night with resident. Available nights for liver transplants and local harvests.

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS:

DESCRIPTION: This elective provides an excellent opportunity to learn about and manage adult and pediatric patients with liver failure in the critical care and acute care settings. In addition, this elective allows the student to experience the problems and complexity of transplantation. The student is responsible, under proper guidance, for managing patients with liver failure from the initial evaluation through the transplant operation and into the post-operative period. The student will be expected to participate in donor, recipient, and elective transplant and hepatobiliary surgeries, assist with the management of adult and pediatric pre– and post-transplant patients, and give an oral case presentation at the conclusion of the rotation.

STUDENT COORDINATOR: Iris Mau (310) 206-2567
E-MAIL: imau@mednet.ucla.edu

REPORT TO: Externs report to Iris @ 7:30 a.m. in 72-229 UCLA. UCLA students contact Iris one week before starting the clerkship.

PREREQUISITES: Medicine and Surgery

AVAILABLE FOR EXterns: Yes

STUDENTS / PERIOD: max 2 min 1

DURATION: 3 weeks

2010-2011 ROTATIONS BEGIN WEEKS: 3, 6, 9, 12, 15, 18, 21, 27, 30, 33, 36, 39, 42, 45, 48

COURSE OBJECTIVES (in order of importance)

1. Knowledge of the pathogenesis, natural history, diagnosis and management of patients with acute and chronic liver failure.
3. Participation in operative procedures, including all aspects of the liver transplant.
4. Knowledge and insight into the immunological problems of transplantation (i.e., rejection).
5. Diagnosis and management of the complications associated with liver transplantation.
6. Ability to examine and cost effectively evaluate patients with liver failure.
7. Knowledge and experience in managing critical care patients.
8. Awareness of the indications for liver transplantation.
10. Exposure to a multidisciplinary approach in the care and management of the transplant patient.
