COURSE CHAIR: Bo Y. Suh, M.D.  PHONE #: (310) 668-6015

COURSE OBJECTIVES (in order of importance)
1. To gain theoretical and clinical skills for the evaluation and management of the infertile couple.
2. To expand the student's knowledge of normal and pathophysiologic processes of reproductive endocrinology and infertility.
3. To actively participate in the clinical environment in order to gain an appreciation of the team approach to reproductive disorders.
4. To gain insight into the current initiatives in laboratory research related to reproductive endocrinology.
5. To become familiar with psychosexual stress in the infertile couple.
6. To become proficient in eliciting a history and physical evaluation and plan of management for the infertile couple.
7. To become proficient in the written and oral presentation of patients with reproductive disorders.
8. To participate in problem solving sessions and tutorial opportunities with the faculty.

STUDENT EXPERIENCES

COMMON PROBLEMS/DISEASES
1. Disorders of ovulation
2. Fallopian tube disorders
3. Endometriosis
4. Androgen excess & PCO
5. Disorders related prolactin
6. Stress factors in infertility
7. Male infertility
8. Menopause/Premenstrual Syndrome

ON-CALL SCHEDULE & WEEKEND ACTIVITIES: No required night call. Student's assistance in weekend clinics, operative procedures and laboratory projects will be variable.

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS:
1. The Faculty Treatment Clinic includes ultrasound, hormone monitoring, semen, preparation, and patient counseling.
2. The Operating Room schedule includes tubal reanastomosis, laparoscopy, tubal surgery, microsurgery, and laser.
3. The consulting sessions include history taking, assessments, and management planning.
4. The laboratory experience will include a research project related to folliculogenesis, male infertility, or related areas.
OG225.02  REPRODUCTIVE ENDOCRINOLOGY AND INFERTILITY

Advanced Clinical Clerkship  Location:  CHS  2003-2004
8/4/2003

COURSE CHAIR:  PHONE #:  T.C. Jackson Wu, M.D., Ph.D.  (310)825-4905

SUPPORTING FACULTY:  All faculty in Reproductive Endocrinology & Infertility

STUDENT COORDINATOR:  PHONE #:  Niki Robinson  (310) 206-3950  E-MAIL: nrobinson@mednet.ucla.edu

REPORT TO:  24-126 CHS @ 8:30 am

PREREQUISITES:  Medicine, Surgery and Ob/Gyn

AVAILABLE TO EXTERNALS:  Yes

STUDENTS / PERIOD:  max 1 min 1

DURATION:  3 weeks

2003-2004 ROTATIONS BEGIN WEEKS:  2,5,8,11,14,17,20,27,30,33,36,39,42,45,48

COURSE OBJECTIVES (in order of importance)
1. To gain an understanding of the basic concepts involved in reproductive endocrinology and infertility.
2. To gain insight info on the pathophysiologic processes involved in reproductive endocrinology and infertility.
3. To gain knowledge in the management of patients with various reproductive endocrinology disorders.
4. To gain exposure to the various aspects of the assisted reproductive technologies including ultrasound, in vitro fertilization, ovulation induction, and intrauterine insemination.
5. To provide an introduction to the in vitro fertilization and andrology laboratories.
6. To become actively involved in conferences including oral presentations, case and group discussions.
7. To provide an opportunity for research in both basic science and clinical projects.

DESCRIPTION:  This in-depth elective is designed for 4th year medical students with basic knowledge of Obstetrics and Gynecology. It will provide the necessary information to understand the many complex issues encountered in Reproductive Endocrinology and Infertility Services, including various androgen excess, ovulatory dysfunction, menstrual disorders, menopause, fertility counseling, and advanced reproductive technology treatment, such as in vitro fertilization and sperm microinjection.

STUDENT EXPERIENCES
COMMON PROBLEMS/DISEASES

AVAILABLE TO EXTERNS: No

STUDENTS / PERIOD: max 1 min 1

DURATION: 3 weeks

2003-2004 ROTATIONS BEGIN WEEKS:  
By Arrangement

DESCRIPTION: The student will participate in the performance of ultrasound examinations within all the divisions of the Department of Obstetrics and Gynecology. Teaching activities include: classes and lectures with members of the staff and faculty, conference and specialty clinics with the Staff, Fellows, and Resident Teams.

COURSE OBJECTIVES (in order of importance)
At the completion of this course the participant should have knowledge of:

1. Normal fetal anatomy.
2. Fetal biometry.
3. Pelvic anatomy.
4. Basic principles and instrumentation of ultrasound physics.
5. Biological effects and safety precautions for use of diagnostic ultrasound.
6. Proper fundamental maintenance and use of equipment.

STUDENT EXPERIENCES

COMMON PROBLEMS/DISEASES

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS:
COURSE OBJECTIVES (in order of importance)

1. Knowledge of normal and abnormal pregnancy, normal and abnormal labor and delivery.
2. Knowledge of antepartum and intrapartum fetal assessment.
3. Knowledge of female reproductive diseases processes (e.g. pelvic inflammatory disease, ectopic pregnancy, abnormal vaginal bleeding etc.).
4. Knowledge of common Gyn Endocrine and infertility problems.
5. Knowledge of pre-invasive and invasive cervical malignancies.
6. Technique and procedures (e.g. normal vaginal delivery, culdocentesis, etc.).
7. Improved history and physical examination, particularly gynecological examination.
8. Utilization of the health care team.

COURSE OBJECTIVES (in order of importance)
1. Gain appreciation for impact of pregnancy on normal physiology.
2. Increase understanding of various pathophysiologic processes in pregnancy.
3. Observe firsthand the effect of pregnancy on many common medical and surgical problems.
4. Gain experience in evaluating and managing high-risk obstetric patients in both the inpatient and outpatient settings.
5. Evaluate and write admission orders for pregnancies complicated by hypertension, diabetes, recurrent urinary tract infectious, incompetent cervix and premature labor.
6. Develop continuing management and treatment plans for these same patients.
8. Learn team care approach in management of high-risk patients working with nurses, dietitians and social workers.
9. Observe and participate in new approaches to fetal diagnosis and therapy.
10. Gain experience in the presentation of conferences.

DESCRIPTION:

STUDENT EXPERIENCES

COMMON PROBLEMS/DISEASES

1. Hypertensive disorders in pregnancy
2. Premature labor rupture of membranes
3. Cardiovas. and Pulmonary disease.
4. Diabetes mellitus in pregnancy
5. Urinary tract infections in pregnancy.
6. Autoimmune disorders complicating preg.
7. Abnormal fetal growth & postdate dis.
8. Multiple gestation Rh disease

ON-CALL SCHEDULE & WEEKEND ACTIVITIES:  
No night-call on this elective, but attendance at weekend rounds to report on hospitalized patients is expected. This elective is NOT intended for those seeking extensive labor and delivery experience.

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS:
STUDENT COORDINATOR: PHONE #:
Antonia Enriquez (310) 222-3561
E-MAIL: aenriquez@obgyn.humc.edu

SUPPORTING FACULTY:
Drs. M. Beall, A. Bieniarz, M. El-Haddad, B. Morgan, M. Ross, and L. Yonekura

COURSE OBJECTIVES (in order of importance)
1. Increase understanding of maternal and fetal physiology.
2. Diagnosis and management of pregnant patients with medical and obstetrical complications during the antepartum, intrapartum, and postpartum periods.
3. Understanding the impact of pathologic conditions on the course of pregnancy and the effect of pregnancy on certain disease processes.
5. Improve skills in clinical diagnosis and the use of laboratory tests and procedures in perinatal medicine.
6. Understanding the concept of perinatal medicine and perinatal research.
7. Utilization of the health care team in the management of high risk pregnancies, i.e., nurse practitioners, nurse educators, dietitians, and social workers.
8. Oral presentations and group discussions.
9. Library research of pertinent literature dealing with perinatal problems.
10. Orientation to research in maternal-fetal medicine.

DESCRIPTION: The student will be involved in the management of pregnant patients with obstetrical and medical complications. The student will observe and participate in the performance and interpretation of NST, CST, and biophysical profiles. The students will spend part of the time seeing patients in the high-risk OB clinics. A tutorial session with the M & M Faculty Attending of the week is integrated in the weekly schedule.

STUDENT EXPERIENCES
COMMON PROBLEMS/DISEASES
1. Premature labor & rupture membranes
2. Hypertensive disorders in pregnancy
3. Diabetes mellitus in pregnancy
4. Cardiovascular and pulmonary disease
5. Infectious disease in pregnancy
6. Third trimester bleeding

STUDENT COORDINATOR: PHONE #: Dixie Pravettone (818) 364-3222 E-MAIL: dpravettone@dhs.co.la.ca.us

COURSE OBJECTIVES (in order of importance)
1. Know the definition of risk factors for pregnancy.
2. Improve knowledge of physiopathology of pregnancy.
3. Diagnose and evaluate disorders of pregnancy.
4. Management of high risk patients in the genetic center, antenatal testing unit, out- and in-patient departments.
5. Interpretation of intrapartum fetal monitor strips, fetal scalp samples, intrauterine pressure monitoring.
6. Learn basic ultrasound skills.
7. Enhance presentation skills.

STUDENT EXPERIENCES
COMMON PROBLEMS/DISEASES
1. Pregnancy induced hypertension

ON-CALL SCHEDULE & WEEKEND ACTIVITIES: Every 4th night.

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS:
COURSE OBJECTIVES (in order of importance)
1. To understand the concept of perinatal medicine and the role of Maternal-Fetal Medicine Specialists in the management of complicated pregnancies.
2. Ability to diagnose common complications of pregnancy.
3. To interpret fetal heart rate patterns.
4. To understand the concept, indications and techniques of fetal testing and evaluations.
5. Exposure to genetic counseling and the role of genetics in pregnancy.
6. To familiarize the student with the use, techniques and indications of ultrasound in pregnancy.
7. To expose the student to indications and techniques of genetic amniocentesis.
8. To provide students hands-on experience in the performance of basic ultrasound evaluations and biophysical profiles.
9. To ensure that the student has working knowledge of development, diagnosis and management of birth defects.
10. To ensure that the student develops the appropriate bedside manner, understanding and empathy to deal with women who have complicated pregnancies with adverse outcomes.

DESCRIPTION: The student will be exposed to obstetrical, medical and surgical complications of pregnancy. The High-Risk Obstetrical Team includes the Maternal-Fetal Medicine Specialist, Geneticist, residents and medical students. The clinical activities include rotations through the high-risk prenatal clinics, the Perinatal Diagnostic Center and the antepartum wards. Weekly perinatal meetings are held and include review of cases, lectures by the Maternal-Fetal Medicine Specialist, and case presentations by the residents and medical students. The Maternal-Fetal Medicine Specialist is the primary supervising attending of the team. The Maternal-Fetal Medicine Specialist with the geneticist and other faculty members teach, supervise and train the medical students in the Perinatal Diagnostic Center.

STUDENT EXPERIENCES

COMMON PROBLEMS/DISEASES
1. Premature rupture of membranes
2. Recurrent pregnancy losses
3. Placental abruption
4. Fetal cranial anomalies
5. Fetal cardiovascular anomalies
6. Fetal genitourinary anomalies
7. Intrauterine growth restriction
8. Abnormal maternal serum screening

ON-CALL SCHEDULE & WEEKEND ACTIVITIES:

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS:
COURSE OBJECTIVES (in order of importance)

1. To become familiar with the diagnosis, staging, and management of gynecologic malignancies.
2. To understand the pathophysiologic process in the clinical and histologic settings of the major gynecologic malignancies.
3. To actively participate on the oncology team in all aspects of primary patient care, admission, evaluation, orders, surgery, and management.
4. To become proficient in the written and oral presentation of patients with multiple problems.
5. To become familiar with historical and current concepts of cancer therapy; surgery, chemo, radiation, and most importantly -- prevention.
6. To improve knowledge of pelvic anatomy by observing radical surgery.

STUDENT EXPERIENCES

COMMON PROBLEMS/DISEASES

1. Ovarian cancer
2. Cervical cancer
3. Endometrial cancer
4. Bowel obstruction
5. Vulva cancer,
6. Chemotherapy
7. Radiation therapy
8.

ON-CALL SCHEDULE & WEEKEND ACTIVITIES: No required night call on this elective. Inpatient rounds on the weekends are expected.

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS:
**COURSE CHAIR:** Griselda Gutierrez, M.D.  
**PHONE #:** (310) 222-3561

**SUPPORTING FACULTY:**  
Dr. Fikrit Atamde

**STUDENT COORDINATOR:** Antonia Enriquez  
**PHONE #:** (310) 222-3561  
**E-MAIL:** aenriquez@obgyn.humc.edu

**REPORT TO:** Antonia Enriquez 7W12 at 8:00 a.m.

**PREREQUISITES:** Medicine, Obstetrics and Gynecology, Surgery

**AVAILABLE TO EXTERNS:** Yes

**STUDENTS / PERIOD:** max 1 min 1

**DURATION:** 3 weeks

**2003-2004 ROTATIONS BEGIN WEEKS:**  
2, 5, 8, 11, 14, 17, 20, 27, 30, 33, 36, 39, 42, 45, 48

**COURSE OBJECTIVES (in order of importance):**
1. Develop a fundamental knowledge base in gynecologic premalignant and malignant disease.
2. Diagnosis and management of gynecologic oncology patients during initial presentation, perioperative periods, and followup.
3. Development of skills in managing postoperative complications and serious medical and psychiatric conditions common in the gynecologic oncology population.
4. Development of patient assessment techniques and clinical skills specific to the gynecologic cancer patient through history and physical examination, choice of diagnostic studies, development of differential diagnoses, development of management plans, and follow-up care.
5. Development of the doctor-patient relationship with particular attention to the communication skills and empathy relevant to discussing end-of-life issues, difficult prognoses.
6. Exposure to the surgical aspects of gynecologic oncology including retroperitoneal anatomy, surgical planes, principles of oncologic surgery, and techniques for improving exposure and for repairing injuries of bowel, bladder, and ureters.
7. Exposure to the fundamentals of radiation oncology as they apply to gynecologic cancer patient.
8. Exposure to the fundamentals of chemotherapy pharmacology and administration as they apply to palliative care.

**DESCRIPTION:** This comprehensive subinternship is designed to provide in-depth exposure to Gynecologic Oncology for 4th year students. This rotation is appropriate for students wishing to evaluate the residency program, those interested in Ob/Gyn or Gyn Oncology as a career choice, those interested in other surgical specialties who desire additional exposure to this patient population and set of procedures, those interested in Medical Oncology, and those interested in Geriatrics and/or Palliative Care for the terminally ill. The student will act at the level of an intern. Subject material covered will include gestational trophoblastic disease, vulvar neoplasms, cervical disease and neoplasia, uterine neoplasms, ovarian neoplasms, chemotherapeutic principles, complicated perioperative/postoperative care, and palliative care.

**STUDENT EXPERIENCES**

**COMMON PROBLEMS/DISEASES**
1. Ovarian cancer  
2. Cervical cancer  
3. Uterine cancer  
4. Gestational trophoblastic disease  
5. Vaginal/vulvar cancer  
6. Gynecologic premalignant disease  
7. Surgical techniques/complications  
8. Palliative/end-of-life care

max 1 min 1

DURATION:  
3 weeks

2003-2004 ROTATIONS BEGIN WEEKS:  
2,5,8,11,14,17,20,27,30,33,36,39,42,45,48

DESCRIPTION: 
10 days:  OB on-call every 3rd day in Labor & Delivery.  Some OB ambulatory care is included in the High-Risk OB Clinic. 10 days:  Gyn Urgent Care every day Monday-Friday.  The experience is designed to proved insight into the scope of obstetrics and gynecology, both from the disease/process management perspective, and from the perspectives of medical quality, accountability and cost effective decisions, and to improve clinical decision making and judgement.

COURSE OBJECTIVES (in order of importance) 
1. Knowledge of female reproductive physiology and pregnancy.  
2. Knowledge of female reproductive disease processes (e.g. pelvic inflammatory disease, ectopic pregnancy, abnormal vaginal bleeding, etc.) and abnormal pregnancy.  
3. Improved skills in the diagnosis of acute gynecologic and obstetric problems.  
4. Improved history and physical examination skills of women.  
5. Management of normal labor and delivery.  
6. Techniques and procedures (e.g., normal vaginal delivery, culdocentesis, fetal monitoring, ultrasound, amniocentesis, C-section).  
7. Participation with the health care team.  
8. Medical record keeping (e.g., problem-oriented pregnancy data collection and assessment).  

STUDENT EXPERIENCES 

COMMON PROBLEMS/DISEASES

1. Normal labor & delivery
2. Abnormal labor, fetal distress
3. Ob/Gyn problems
4. Ob/Gyn emergencies
5. Antenatal fetal assessment
6. Intrapartum fetal assessment
7. Postpartum complications
8. Problems in gynecology urgent care

AVAILABLE TO EXTERNALS: Yes

PREREQUISITES: Family Medicine, Inpatient Medicine, Outpatient Medicine, Pediatrics, Ob/Gyn, and Surgery

STUDENTS / PERIOD: max 1 min 1

DURATION: 3 weeks

2003 - 2004 ROTATIONS BEGIN WEEKS: By Arrangement

DESCRIPTION: This elective is for students who are interested in a broader view of women’s health. The goal is to direct the students’ attention to issues in women’s health (such as barriers to access to care) by caring for women who have only episodic access (Urgent Care Clinic) or access through special categorical programs (Family Planning). The full range of ages of women, from adolescents through menopausal aged women, will be cared for. Students will have primary responsibility for the assessment of the patient and the development of management plans. When appropriate, students will be able to follow their patients into the operative and inpatient settings. Students will have ongoing daily contact with faculty, and will be expected to contribute to the weekly formal didactic sessions.

STUDENT EXPERIENCES

COMMON PROBLEMS/DISEASES
1. Abnormal vaginal bleeding
2. Pelvic pain
3. Primary care issues/health maintenance
4. Menopausal syndrome
5. Sexually transmitted infections
6. Contraception
7. Infertility
8. Adolescent gynecology
9. Urogynecology

2,5,8,11,14,17,20,27,30,33,36,39,42,45

DESCRIPTION:  
With changes in how health care is supplied and renewed educational focus on ambulatory care, many undergraduate students are not exposed to the complexities or the subtleties of Inpatient Gynecologic Care. This elective is specifically for the student who desires intense exposure to a busy operative Gynecologic Inpatient Service. Because of the high surgical volume and the patient mix at this world-renowned tertiary referral center, the student will have the opportunity to observe the full range of operative gynecologic procedures performed for the management of benign disease processes, as well as participate in the care of numerous patients undergoing such procedures.

COURSE OBJECTIVES (in order of importance)
1. To master the fundamentals of the management of the diseases leading to admission to an inpatient gynecology service.
2. To be able to complete a thorough pre-operative history and physical and develop an appropriate differential diagnosis and management pathway for patients presenting with disease include in objective 1.
3. To be able to describe the performance of the commonly performed surgical procedures employed in the management of patients presenting with the diseases included in objective 1.
4. To be able to perform post operative evaluation and appropriate intervention for patients undergoing management of diseases included in objective 1.

STUDENT EXPERIENCES

COMMON PROBLEMS/DISEASES
1. Leiomyomata uteri
2. Adenomyosis
3. Endometriosis
4. Benign adnexal masses
5. Symptomatic pelvic relaxation
6. Genuine stress urinary incontinence
7. Pelvic inflammatory disease
8. Chronic pelvic pain

INPATIENT: 100%
OUTPATIENT: 0%
CONSULTATION: 10%
PRIMARY CARE: 90%
