DESCRIPTION: The UCLA Student Run Homeless Family Clinics are managed and staffed by UCLA students with volunteer faculty supervision. Working with the faculty, Student Chiefs oversee clinic sessions and evening seminars, manage the clinic schedule, patient flow, medical records, and medical formulary and supplies and provide teaching and mentoring to the junior students. Student Chiefs thus have the opportunity to hone their leadership and teaching skills while obtaining practical training in practice management. Each Student Chief has primary responsibility for at least one of the major administrative functions of the clinic or its programs, which include educational innovation and community outreach.

ON-CALL SCHEDULE & WEEKEND ACTIVITIES: Samoshel: 9:00 a.m. – Noon clinic on Saturdays. West LA Winter Shelter Clinic Monday evenings 6-9 PM

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS: Applicants for this honor elective must demonstrate prior involvement in SRHC or a strong interest in serving as a student-run clinic manager. An announcement for Student Chief applications is made to the MS3 Class sometime in the Spring. Those interested in becoming a Student Chief after the application deadline may contact the Course Chair at a later date to discuss applying for the Elective. Chiefs attend a total of 8 clinics of their choice throughout the year and must concurrently enroll in FP250.03 in order to get attendance credit. Student Chiefs must complete assigned organizational duties in coordination with the Chief Team and Course Chair, attend organizational meetings throughout the year at dates to be determined, and attend mid-year and end of year reflection sessions.

FP250.02 FAMILY PRACTICE IN A MANAGED CARE SETTING

Advanced Clinical Clerkship

COURSE OBJECTIVES (in order of importance)

1. Development of skills in the diagnosis and management of patient care in a Family Practice office utilizing a managed care approach to decision making.
2. Utilize the appropriate problem-solving skills in patient care management.
3. Knowledge and development of clinical procedures performed in the physician's office.
4. Ability to have a professional attitude in the clinical setting.
5. Obtain knowledge of patient referrals to other physicians, home health agencies, and supportive services in a managed care setting.
6. Understand the importance of continuity of patient care in the clinical setting.
7. Develop an understanding of how the managed care physician manages his office staff under the group practice model.
8. Develop an understanding of how the private physician deals with patient emergencies.
9. Understand the financial obligations and responsibilities encompassed in a managed care setting.
10. Understand the role of the physician in the clinical setting.

DESCRIPTION: This course offers on-site clinical experience to the third- or fourth-year student in a managed care practice under the auspices of a family practitioner. The practice encompasses a full array of out-patient clinical experiences. Introduction to the concept of managed care will be stressed, with its impact on the decision making process.

Location: ASSOC (Falmouth, Jamaica)

2013-2014

Revised: 12/10/12

COURSE CHAIR:
Bruno Lewin, M.D.

PHONE #:
(323) 783-1611

COURSE OBJECTIVES (in order of importance)

By the end of the elective, students are expected to gain:

E-MAIL:

1. Experience in providing health care in a setting with limited resources.
2. Appreciation for providing care to medically underserved, impoverished populations.
3. Understanding of the relationship between poverty and disease
4. Insight into the impact of culture on understanding, approach and management of disease as well as disease prevention.
5. Understanding of the practical elements of clinic management, including the concepts of patient flow, triage, medical record keeping, patient confidentiality, dispensary services and coordination of care
6. First-hand experience of immersion into another culture and the adaptation skills involved in being a "minority" in a foreign environment
7. An appreciation of working with a multidisciplinary team including nurses, nurse practitioners, and other providers
8. Improved efficiency and skill in conducting a direct history and physical, and performing outpatient procedures
9. Insight into public health issues and the concept of treating an individual in the context of his or her community.

STUDENTS / PERIOD: max 8 min 2

DURATION: 1 week

2013-2014 ROTATIONS BEGIN WEEKS:
Elective will take place April 20-28, 2013; week 42

DESCRIPTION: This is an intense, high-volume clinical experience offered once a year at a free clinic in Falmouth, Jamaica. Falmouth is a locally impoverished region only 30 miles from Montego Bay. The population of the city and surrounding countryside has a high rate of chronic illness, including diabetes, hypertension, heart disease, asthma, and related complications. They also suffer from infections and skin conditions found more commonly in the tropics. Students will provide patient care under direct attending supervision. In addition, students will be responsible for preparing a scholarly project related to the clinical experience and attend a minimum of four (4) of the dinner seminars on cross-cultural medicine and international health topics offered as curriculum and preparation for the experience.

5, 8, 11, 14, 17, 20, 27, 30, 33, 38, 41, 44, 47

DESCRIPTION: The externship is designed to be flexible to meet the educational goals of the student desiring exposure to the broad spectrum nature of family medicine. The student may choose from among specific areas of training, working directly with our family medicine residents and faculty in the hospital and outpatient clinics. Inpatient Medicine, Surgery, Intensive Care, Ortho/Sports Medicine, Outpatient Pediatrics, Ob-Gyn and Emergency Medicine are all options that may be combined in 1, 2 or 3 week blocks during the rotation. Schedule will vary according to the service that is chosen. This is an excellent opportunity to learn in a county hospital with a wonderfully diverse patient population in a student friendly environment.

COURSE CHAIR:

Gilbert Granados, M.D., M.P.H.,
Jyoti Puvvula, M.D., M.P.H.

PHONE #:

(310) 534-6221

COURSE OBJECTIVES (in order of importance)

1. An appreciation of the role of the family physician in providing primary care to a broad, largely underserved patient population.
2. Experience in minor surgery, Flex Sigmoidoscopy, and other procedures in Family Medicine.
3. An introduction into culturally competent medicine.
4. An appreciation of the relationship between poverty and health.
5. Improved skills in assessment and management of health problems seen commonly in an ambulatory care setting.
6. Improved skills in history and physical examination and the use of the clinical lab.
7. Exposure to the Patient Centered Medical Home (PCMH).
8. An appreciation of the importance of home visits.
9. Introduction to Sports Medicine.
10. Overview of the American Health Care "System."

Revised: 12/10/12**

COURSE CHAIR:

Cindy Yang, M.D.
Pamela Davis, M.D. (co-Chairs)

PHONE #:

(818) 993-4054

COURSE OBJECTIVES (in order of importance)

1. To define the problems of the patient's visit in an independent setting with direct supervision.
2. To apply pathophysiologic principles to understanding the problem and management.
3. To attempt to understand each patient's unique needs for medical care.
4. To expose the student to a variety of medical problems in a busy family medicine office.
5. To develop an appreciation of some of the ancillary disciplines that a family physician uses, i.e., nutrition, home health care, geriatrics, and subspecialty consultation.
6. To develop an in-depth understanding of a few areas of interest in family medicine through tutorials and student presentations.

STUDENTS / PERIOD: max 1 min 1

DURATION: 3 weeks

2013-2014 ROTATIONS BEGIN WEEKS: 2, 5, 8, 11, 14, 17, 20

DESCRIPTION: This course provides a high volume clinical experience in the clinic and hospital setting at a major HMO facility with a residency in Family Practice.

- COURSE OBJECTIVES (in order of importance)**
1. Opportunity to provide primary care within the Family Practice Clinic with both urgent care and continuity practice problems, including high volume pediatric and gynecologic exposure.
 2. Opportunity to provide primary hospital care on the Family Practice Resident Service which has an average census of 20-25 (including ICU and CCU patients).
 3. Opportunity to work with a number of skilled and experienced clinicians, all with years of teaching experience.
 4. Opportunity to provide care for the medically underserved at the Venice Family Clinic and Asian Pacific Health Care Venture
 5. Opportunity to gain exposure to aggressive cancer screening, including flexible video-sigmoidoscopy.
 6. Opportunity to better understand extended care and the team approach toward dealing with the medical needs of the elderly.
 7. Opportunity to see a major HMO with over 40 years of experience in managed care health delivery.

STUDENT EXPERIENCES

- COMMON PROBLEMS/DISEASES**
1. Hypertension, CHF, angina
 2. URI, pharyngitis
 3. Asthma, pneumonia, COPD
 4. Diabetes, lipid disorders
 5. Depression/anxiety
 6. Headache
 7. Gastroenteritis, ulcer
 8. Musculoskeletal

DURATION: 3 weeks

2013-2014 ROTATIONS BEGIN WEEKS:

By Arrangement

DESCRIPTION: This elective provides students with an opportunity to improve communication and develop a strong clinical base to their career in medicine. The residents at the Kaiser Fontana site see over 16,000 patients a year in clinic, giving students an ample opportunity to see a wide range of patient problems. Students are encourage to see patients of all ages and backgrounds. The clinic is well equipped with a telephone translation service which will help students learn how to work with an interpreter. In this department we encourage the student to become comfortable in eliciting a comprehensive history and physical and learn how to develop an appropriate assessment and plan. Each case is always presented to either the attending or resident and the student will encouraged to consider medical differentials and to incorporate age appropriate health maintenance issues. Students will discuss not only patient centered problems, but also community, environmental and health policy factors that have an impact on health care.

- COURSE OBJECTIVES (in order of importance)**
1. Learn to provide health care to a medically underserved population in a community based free clinic.
 2. Learn to diagnose and manage common problems in ambulatory family medicine.
 3. Learn about interrelationships between community agencies, e.g., interacting with county health facilities, shelters, detox programs.
 4. Work with community volunteers -- physicians, pharmacists, nurses, clinic assistants and health educators.
 5. Prescribe medications to patients, keeping cost containment in mind.
 6. Learn to understand how cultural issues impact on health care delivery.
 7. Become exposed to special health care needs of new immigrants. For example: screening for parasitic infections and treating positive results; screening for Tuberculosis; providing appropriate immunizations.
 8. Management of chronic diseases such as diabetes.
 9. Homeless outreach.
 10. Teen clinic / School based care

DESCRIPTION: This course is designed to give the student exposure to ambulatory care family practice in a free clinic setting. Students completing this course will have the opportunity to volunteer at the Venice Family Clinic in the future under direct supervision from the course faculty. It is required that the student speak Spanish.
