COLLEGE AFFILIATION: Applied Anatomy

AVAILABLE FOR EXTERNS: Yes

STUDENTS / PERIOD: max 16min 10

DURATION: 2 weeks

2013-2014 ROTATIONS BEGIN WEEKS:
33 * For a three-week clinical experience, contact Dr. Malcolm Taw at mtaw@mednet.ucla.edu

DESCRIPTION: This two-week clinically-oriented course is designed for students who are interested in learning about traditional Chinese Medicine (TCM) and in incorporating this system of medicine into their practice and lifestyle. The focus will be on the modern concepts and applications of TCM as well as its practical synergistic integration with modern Western Medicine in clinical care. The case discussion format with demonstration and hands-on experience using patients and cases from the center clinic will be used throughout the course.

STUDENT EXPERIENCES

COMMON PROBLEMS/DISEASES
1. Fibromyalgia
2. Myofascial pain syndrome (head, back)
3. IBS
4. Chronic fatigue syndrome
5. Hypertension
6. Patients with polypharmacy
7. Women’s health problems
8. Asthma/allergic rhinitis/sinusitis

ON-CALL SCHEDULE & WEEKEND ACTIVITIES: No call or weekend requirements.

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS: Oral presentations of clinical cases. (This is very much stressed).
Card Conference every day during lunch, 12:00 – 1:00.
DESCRIPTION: This course is designed to expose the students to common inpatient and outpatient consultative questions in cardiology. Basic understanding of the indications of various tests will be obtained. Students are encouraged to observe and may participate in the performance or interpretation of exercise stress testing, echocardiography and nuclear cardiology under supervision. Increased proficiency in EKG interpretation will be obtained.

STUDENTS / PERIOD: max 1 min 1

DURATION: 3 weeks

2013-2014 ROTATIONS BEGIN WEEKS:
2, 5, 8, 11, 14, 17, 20, 27, 30, 33, 38, 41, 44, 47

DESCRIPTION: St. Mary Med. Ctr. is a 400-bed community teaching hospital. The student will participate in the diagnostic and treatment decisions as a member of a combined consultative and ward team service. Students may be responsible for the initial consultation evaluation in conjunction with the supervising resident. They will present their findings and impressions to an attending cardiologist for recommendations. The team will care for a number of ward cardiology patients, and the student would be responsible for daily notes, orders, and some procedures under the guidance and supervision of the residents and attending physicians. Students will gain additional skills in EKG interpretation, physical diagnosis, and the management of common cardiac conditions. Students will observe and learn about cardiac stress testing, echoangiography, cardiac catheterization procedures, and cardiac surgical procedures.

Research Activities: The Div. of Derm. is building a research program with the goal of understanding the immune responses in skin disease. Major interests include the role of T-cells and cytokines in infectious and neoplastic diseases of skin. Other interests include retinoid metabolism, cutaneous glutathione and phototoxicity, mechanisms of toxicity of dioxin. The Division operates a fully accredited training program leading to certification by the American Board of Dermatology.

2, 5, 8, 11, 14, 17, 20, 27, 30, 33, 38, 41, 44, 47  
DESCRIPTION: This course will serve as an introduction to the fundamentals of surgery of the cutaneous surfaces and dermatopathological differential diagnosis of common skin neoplasms and diseases. In addition, clinical aspects of aging and the applications of different cosmetic procedures and anti-aging techniques will be discussed. This is a flexible rotation, tailored to the student’s needs so that the Mon/Fri time can include rotations in general dermatology, private practice, or research laboratories.

COURSE OBJECTIVES (in order of importance)  
1. Diagnosis of skin cancer.  
2. Instruction and approach to the management of cutaneous malignancies.  
3. Proper instruction on tissue handling and movement for minor excisions. Included will be instrumentation. Opportunity to assist in minor surgeries.  
4. Attend grand rounds/dermatologic surgery lectures.  
5. Instruction on the management of small surgical defects by flaps, grafts, and granulation.  
8. Approach to the diagnosis and management of benign skin conditions requiring surgery as a treatment.  
9. Approach to the management of patient in pre-op and post-op status.  
10. Approach to cosmetic dermatology and the topical care of skin to improve its health and appearance.

ON-CALL SCHEDULE & WEEKEND ACTIVITIES: Consults and Rounding on In-house patients.

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS: Students will have the opportunity to work in the diabetes basic science laboratory in the afternoons.
STUDENT EXPERIENCES

CLOSE CONTACT WITH:
1. Pathogenesis and natural history, the orderly investigation, differential diagnosis and management of thyroid disease, diabetes mellitus, adrenal disorders, pituitary disorders, reproductive abnormalities, and parathyroid disorders.
2. Medical interviewing and physical examination skills.
4. Interpretation of endocrine tests: Thyroid function tests, glucose tolerance tests, hormonal measurements, stimulation and suppression tests.
5. Appropriate format for writing consultations.
6. Basic science foundations of pathophysiological mechanisms underlying diseases of the thyroid, adrenal, pituitary, pancreas, gonads, parathyroid, and other metabolic disorders, including nutritional disorders.
7. Diag. & mgmt. of complex in-patient problems such as diabetic ketoacidosis, thyrotoxicosis, thyroid nodules, goiter, hypo-thyroidism, obesity, Cushing’s disease, Addison’s disease, etc.
8. Oral presentation of clinical cases.
9. Library research and interpretation of the literature.
10. Outcome of health care, e.g., patient adherence & satisfaction.

In the clinics, students will evaluate patients independently and discuss each patient with an attending physician.
ME226.03  CLINICAL NUTRITION

Advanced Clinical Clerkship  Location: UCLA  2013-2014

COURSE CHAIR:  PHONE #:  COURSE OBJECTIVES (in order of importance)
David Heber, M.D., Ph.D.  (310) 206-1987
Zhaoping Li, M.D., Ph.D.

E-MAIL: dheber@mednet.ucla.edu

1. To review and supplement the basic elements of nutrition that all doctors should know with specific reference to the type of practice activity the student is planning.
2. To develop skills in nutritional assessment and intervention.
3. To develop an understanding of nutrients and gene interaction.
4. To develop an understanding of the pathogenesis of nutritional disorders such as obesity.
5. To develop an understanding of the impact of nutrition on the development of chronic diseases, such as cardiovascular disease, hypertension, diabetes, hypercholesterolemia and cancer.
6. To gain familiarity with therapeutic diets for obesity and other nutrition related chronic diseases.
7. To develop skills in counseling patients for healthy lifestyles, appropriate use of vitamin and mineral supplements.
8. To understand the indications and results of the medical and surgical treatment of obesity.
9. To develop skills in interacting with dietitians in a medical practice setting.
