Course: Reproductive Endocrinology

**Course Objectives**

1. To gain theoretical and clinical skills for the evaluation and management of the infertile couple.
2. To expand the student’s knowledge of normal and pathophysiologic processes of reproductive endocrinology and infertility.
3. To actively participate in the clinical environment in order to gain an appreciation of the team approach to reproductive disorders.
4. To gain insight into the current initiatives in laboratory research related to reproductive endocrinology.
5. To become familiar with psychosexual stress in the infertile couple.
6. To become proficient in eliciting a history and physical evaluation and plan of management for the infertile couple.
7. To become proficient in the written and oral presentation of patients with reproductive disorders.

**Introduction:**

This elective provides an opportunity to participate as a member of a busy Gynecologic Endocrinology Service with close faculty supervision.

**Student Experiences**

**On-Call Schedule & Weekend Activities:** No required night call. Student's assistance in weekend clinics, operative procedures and laboratory projects will be variable.

**Additional Comments and Other Special Requirements:**

1. The faculty Treatment Clinic includes ultrasound, hormone monitoring, semen preparation, and patient counseling.
2. The operating room schedule includes tubal reanastomosis, laparoscopy, tubal surgery, microsurgery, and laser.
3. The consulting sessions include history taking, assessments, and management planning.
4. The laboratory experience will include a research project related to folliculogenesis, male infertility, or...
COURSE CHAIR: T.C. Jackson Wu, M.D., Ph.D. (310) 825-8581

SUPPORTING FACULTY: All faculty in Reproductive Endocrinology & Infertility

STUDENT COORDINATOR: Martie Banks (310) 825-9945

REPORT TO: 24-126 CHS @ 8:30 am

PREREQUISITES: Medicine, Surgery and Ob/Gyn

AVAILABLE TO EXTERNS: Yes

STUDENTS / PERIOD: max 1 min 1

DURATION: 3 weeks

2001-2002 ELECTIVES BEGIN WEEKS: 1,5,8,11,14,17,20,27,30,33,36,39,42,45,48

COURSE OBJECTIVES (in order of importance)
1. To gain an understanding of the basic concepts involved in reproductive endocrinology and infertility
2. To gain insight into the pathophysiologic processes involved in reproductive endocrinology and infertility
3. To gain knowledge in the management of patients with various reproductive endocrinology disorders
4. To gain exposure to the various aspects of the assisted reproductive technologies including ultrasound, in vitro fertilization, ovulation induction, and intrauterine insemination
5. To provide an introduction to the in vitro fertilization and andrology laboratories
6. To become actively involved in conferences including oral presentations, case and group discussions
7. To provide an opportunity for research in both basic science and clinical projects

DESCRIPTION: This in-depth elective is designed for senior medical students with basic knowledge of obstetrics and gynecology. It will provide the necessary information to understand the many complex issues encountered in reproductive endocrinology and infertility services, including various androgen excess, ovulatory dysfunction, menstrual disorders, menopause, fertility counseling, and advanced reproductive technology treatment, such as in vitro fertilization and sperm microinjection.

ON-CALL SCHEDULE & WEEKEND ACTIVITIES: None

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS:
COURSE OBJECTIVES (in order of importance)
At the completion of this course the participant should have knowledge of:

1. Normal fetal anatomy.
2. Fetal biometry.
3. Pelvic anatomy.
4. Basic principles and instrumentation of ultrasound physics.
5. Biological effects and safety precautions for use of diagnostic ultrasound.
6. Proper fundamental maintenance and use of equipment.

COMMON PROBLEMS/DISEASES
1. Fetal viability
2. Estimated gestational age
3. Estimated gestational weight
4. Placenta previa
5. Ectopic pregnancy
6. R/O pelvic mass
7. Fetal aneuploidy

ON-CALL SCHEDULE & WEEKEND ACTIVITIES: N/A

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS:
COURSE CHAIR: Dotun Ogunyemi, M.D.  (310) 668-4617

SUPPORTING FACULTY: Full time and Attending Faculty of Ob/Gyn Department

STUDENT COORDINATOR: Charles Bagley (310) 668-4606

REPORT TO: Dr. Dotun Ogunyem, KDMC Room 2002 @ 9:00 A.M.

PREREQUISITES: Satisfactory completion of core Ob/Gyn, Medicine, Pediatrics, and Surgery

AVAILABLE TO EXTERNS: No

STUDENTS / PERIOD: max 2 min 1

DURATION: 3 weeks

2001-2002 ELECTIVES BEGIN WEEKS: By Arrangement

DESCRIPTION:

COURSE OBJECTIVES (in order of importance)

1. Knowledge of normal and abnormal pregnancy, normal and abnormal labor and delivery.
2. Knowledge of antepartum and intrapartum fetal assessment.
3. Knowledge of female reproductive diseases processes (e.g. pelvic inflammatory disease, ectopic pregnancy, abnormal vaginal bleeding etc.)
4. Knowledge of common Gyn Endocrine and Infertility problems
5. Knowledge of pre-invasive and invasive cervical malignancies.
6. Technique and procedures (e.g. normal vaginal delivery, culdocentesis, etc.)
7. Improved history and physical examination, particularly gynecological examination.
8. Utilization of the health care team.

STUDENT EXPERIENCES

COMMON PROBLEMS/DISEASES

REPORT TO: Cedars-Sinai Medical Center, 8700 Beverly Blvd, Suite 3622, 3rd Floor, South Tower @ 9:00 am.

PREREQUISITES: Core Clerkships in Ob-Gyn, Medicine, and Surgery

AVAILABLE TO EXTERNALS: Yes

STUDENTS / PERIOD: max 1 min 1

DURATION: 3 weeks

2001-2002 ELECTIVES BEGIN WEEKS: By Arrangement

COURSE OBJECTIVES (in order of importance)
1. Increase understanding of the effect of pregnancy on normal female physiology.
2. Gain insight into the pathophysiologic processes of pregnancy.
3. Become an active member of the obstetrical team by participating in all aspects of patient care evaluation, orders, procedures, and management planning including the management of high risk pregnancies.
4. Become proficient in the oral presentation of patients with multiple problems.
5. Gain experience in establishing a plan of management for major prenatal and intrapartum high risk conditions.
6. Gain experience in the Antenatal Testing Unit and ultrasound in the evaluation of the high risk fetus.

DESCRIPTION: An opportunity to provide primary patient care in a busy obstetrical unit with emphasis on the antepartum and intrapartum management of the high risk OB patient.

STUDENT EXPERIENCES

COMMON PROBLEMS/DISEASES
1. Diabetes Mellitus in pregnancy
2. Hypertensive disorders in pregnancy
3. Premature labor and rupture of Memb.
4. Placenta previa
5. Multiple gestation
6. Intrauterine growth retardation
7. Autoimmune disease in pregnancy

ON-CALL SCHEDULE & WEEKEND ACTIVITIES:  
There is no nightcall on this elective, but attendance at weekend rounds to report on hospitalized patients is expected. This elective is NOT intended for those seeking extensive labor and delivery experience.

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS:
**COURSE CHAIR:**
Anna LaHue, M.D.  
(310) 222-3840

**SUPPORTING FACULTY:**
Drs. Beall, Ross, Chan, Chao, Mann, Taber, Medearis

**STUDENT COORDINATOR:**
Carlida Bocatijia  
(310) 222-3886

**REPORT TO:** Dee White, 7th Floor West, Room 12 on the first day of the rotation at 7:30 am

**PREREQUISITES:** Core clerkships in Ob/Gyn, Medicine, Surgery and Pediatrics

**AVAILABLE TO EXTERNS:** Yes

**STUDENTS / PERIOD:** max 1 min 1

**DURATION:** 3 weeks

**2001-2002 ELECTIVES BEGIN WEEKS:**
5, 11, 17, 22, 28, 34, 40, 46

**COURSE OBJECTIVES (in order of importance)**
1. Increase understanding of maternal and fetal physiology.
2. Diagnosis and management of pregnant patients with medical and obstetrical complications during the antepartum, intrapartum, and postpartum periods.
3. Understanding the impact of pathologic conditions on the course of pregnancy and the effect of pregnancy on certain disease processes.
5. Improve skills in clinical diagnosis and the use of laboratory tests and procedures in perinatal medicine.
6. Understanding the concept of perinatal medicine and perinatal research.
7. Utilization of the health care team in the management of high risk pregnancies, i.e., nurse practitioners, nurse educators, dietitians, and social workers
8. Oral presentations and group discussions.
9. Library research of pertinent literature dealing with

**DESCRIPTION:** The student will be involved in the management of pregnant patients with obstetrical and medical complications. The student will observe and participate in the performance and interpretation of NST, CST, and biophysical profiles. The students will spend part of the time seeing patients in the high-risk OB clinics. A tutorial session with the M & M Faculty attending of the week is integrated in the weekly schedule.

**COMMON PROBLEMS/DISEASES**
1. Premature labor & rupture membranes
2. Hypertensive disorders in pregnancy
3. Diabetes mellitus in pregnancy
4. Cardiovascular and pulmonary disease
5. Infectious disease in pregnancy
6. Third trimester bleeding
7. Abnormal fetal growth & postdates pregnancy

COURSE CHAIR:  
Anna LaHue, M.D.  
(310) 222-3840

SUPPORTING FACULTY:  
Dr. Fikrit Atamdeede

STUDENT COORDINATOR:  
Carlida Bocatijia  
(310) 222-3886

REPORT TO:  
Dee White, Harbor-UCLA, Dept. of OB/GYN  
7W, at 8:00 a.m.

AVAILABLE TO EXTERNNS:  
Yes

PREREQUISITES:  
Medicine, Obstetrics and Gynecology, Surgery

STUDENTS / PERIOD:  
max 1 min 1

DURATION:  
3 weeks

2001-2002 ELECTIVES BEGIN WEEKS:  
1, 5, 8, 11, 14, 17, 20, 27, 30, 33, 36, 39, 42, 45, 48

COURSE OBJECTIVES (in order of importance)

1. Develop a fundamental knowledge base in gynecologic premalignant and malignant disease.
2. Diagnosis and management of gynecologic oncology patients during initial presentation, perioperative periods, and followup.
3. Development of skills in managing postoperative complications and serious medical and psychiatric conditions common in the gynecologic oncology population.
4. Development of patient assessment techniques and clinical skills specific to the gynecologic cancer patient through history and physical examination, choice of diagnostic studies, development of differential diagnoses, development of management plans, and follow-up care.
5. Development of the doctor-patient relationship with particular attention to the communication skills and empathy relevant to discussing end-of-life issues, difficult prognoses.
6. Exposure to the surgical aspects of gynecologic oncology including retroperitoneal anatomy, surgical planes, principles of oncologic surgery, and techniques for improving exposure and for repairing injuries of bowel, bladder, and ureters.
7. Exposure to the fundamentals of radiation oncology as they apply to gynecologic cancer patient.
8. Exposure to the fundamentals of chemotherapy pharmacology and administration as they apply to gynecologic cancer patient.

DESCRIPTION: 
This comprehensive subinternship is designed to provide in-depth exposure to gynecologic oncology for fourth-year students. This rotation is appropriate for students wishing to evaluate the residency program, those interested in Ob/Gyn or Gyn Oncology as a career choice, those interested in other surgical specialties who desire additional exposure to this patient population and set of procedures, those interested in medical oncology, and those interested in geriatrics and/or palliative care for the terminally ill. The student will act at the level of an intern. Subject material covered will include gestational trophoblastic disease, vulvar neoplasms, cervical disease and neoplasia, uterine neoplasms, ovarian neoplasms, chemotherapeutic principles, complicated perioperative/postoperative care, and palliative care.

COURSE OBJECTIVES (in order of importance)

1. Develop a fundamental knowledge base in gynecologic premalignant and malignant disease.
2. Diagnosis and management of gynecologic oncology patients during initial presentation, perioperative periods, and followup.
3. Development of skills in managing postoperative complications and serious medical and psychiatric conditions common in the gynecologic oncology population.
4. Development of patient assessment techniques and clinical skills specific to the gynecologic cancer patient through history and physical examination, choice of diagnostic studies, development of differential diagnoses, development of management plans, and follow-up care.
5. Development of the doctor-patient relationship with particular attention to the communication skills and empathy relevant to discussing end-of-life issues, difficult prognoses.
6. Exposure to the surgical aspects of gynecologic oncology including retroperitoneal anatomy, surgical planes, principles of oncologic surgery, and techniques for improving exposure and for repairing injuries of bowel, bladder, and ureters.
7. Exposure to the fundamentals of radiation oncology as they apply to gynecologic cancer patient.
8. Exposure to the fundamentals of chemotherapy pharmacology and administration as they apply to gynecologic cancer patient.

COMMON PROBLEMS/DISEASES

1. Ovarian cancer
2. Cervical cancer
3. Uterine cancer
4. Gestational trophoblastic disease
5. Vaginal/vulvar cancer
6. Gynecologic premalignant disease
7. Surgical techniques/complications

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS:

The student will have the opportunity to see private patients both in the outpatient and inpatient settings at community hospitals if time permits with the faculty supervisor. The weekly schedule will vary depending on the operative schedule. Also, the student will be responsible for one presentation at M&M conference, and case presentations at Tumor Board.
Subinternship

Location: HARBOR

2001-2002
3/9/2001

COURSE CHAIR: Anna LaHue, M.D.
PHONE #: (310) 222-3840

SUPPORTING FACULTY:
Drs. Beall, Chao, Deutsch, Nelson, Ross, & Hue

STUDENT COORDINATOR: Carlida Bocatijja
PHONE #: (310) 222-3886

REPORT TO: Dee White, 7th Floor West Room 12 at 7:30 a.m. on the first day of the rotation.

PREREQUISITES: Core Clerkships in Obstetrics & Gynecology, Medicine, and Surgery.

AVAILABLE TO EXTERNS: Yes

STUDENTS / PERIOD: max 1 min 1

DURATION: 3 weeks

2001-2002 ELECTIVES BEGIN WEEKS:
1, 5, 8, 11, 14, 17, 20, 27, 30, 33, 36, 39, 42, 45, 48

COURSE OBJECTIVES (in order of importance)
1. Knowledge of female reproductive physiology and pregnancy.
2. Knowledge of female reproductive disease processes (e.g., pelvic inflammatory disease, ectopic pregnancy, abnormal vaginal bleeding, etc.) and abnormal pregnancy.
3. Improved skills in the diagnosis of acute gynecologic and obstetric problems.
4. Improved history and physical examination skills of women.
5. Management of normal labor and delivery.
6. Techniques and procedures (e.g., normal vaginal delivery, culdocentesis, fetal monitoring, ultrasound, amniocentesis, C-section).
7. Participation with the health care team.
8. Medical record keeping (e.g., problem-oriented pregnancy data collection and assessment.)

DESCRIPTION:
10 days: Ob on-call every 3rd day in Labor & Delivery. Some OB ambulatory care is included in the high risk OB clinic. 10 days: Gyn Urgent Care every day Monday-Friday. The experience is designed to proved insight into the scope of obstetrics and gynecology, both from the disease/process management perspective, and from the perspectives of medical quality, accountability and cost effective decisions, and to improve clinical decision making and judgement.

STUDENT EXPERIENCES

COMMON PROBLEMS/DISEASES
1. Normal labor & delivery
2. Abnormal labor, fetal distress
3. Ob/Gyn problems
4. Ob/Gyn emergencies
5. Antenatal fetal assessment
6. Intrapartum fetal assessment
7. Postpartum complications
8. Problems in gynecology urgent care

AVAILABLE TO EXTERNS:
No

STUDENTS / PERIOD: max 1 min 1

DURATION: 3 weeks

2001-2002 ELECTIVES BEGIN WEEKS:
1, 5, 8, 11, 14, 17, 20, 27, 30, 33, 36, 39, 42, 45, 48

COURSE OBJECTIVES (in order of importance)
1. Develop the ability to do a comprehensive pelvic examination of both the pregnant and non-pregnant patient.
2. Evaluate acute obstetric and gynecologic problems in the emergency room.
3. Improve surgical skills in the operating room.
4. Follow patients with uncomplicated and complicated labors.
5. Deliver uncomplicated patients.
6. Follow antepartum and post partum high risk obstetrical patients.
7. Improve outpatient OB/GYN clinical skills.
8. Enhance formal presentation skills on rounds and conferences.

DESCRIPTION:
This is a 4 week rotation for students who wish to deepen their knowledge of general OB/GYN and improve their clinical diagnostic and therapeutic skills in obstetrics and gynecology.

STUDENT EXPERIENCES

COMMON PROBLEMS/DISEASES
1. Diabetes in pregnancy
2. Hypertensive disorders
3. Premature labor
4. Third trimester bleeding
5. Cervical dysplasia/cancer
6. Abnormal uterine bleeding
7. Intrapartum/antepartum fetal assessment

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS:
OG357.01  FOURTH YEAR ELECTIVE IN WOMEN'S HEALTH: OB/GYN PERSPECTIVE

Subinternship: COURSE CHAIR: Anna K. LaHue, M.D.
PHONE #: 310-222-3840

LOCATION: Harbor/Assoc

COURSE OBJECTIVES (in order of importance):
1. Understand the concept of population-based medical care
2. Appreciate the social issues and barriers to access to care for women, who are medically uninsured or under-insured, and/or living in under-served communities
3. Develop skills in assessing social contexts of illnesses and disease
4. Applying Ob/Gyn skills in the broader context of women's health
5. Enhance diagnostic and management clinical skills in ambulatory Ob/Gyn care, especially in the sites where women seek episodic care.
6. Develop specific clinical skills, including vaginal microscopy, and refinement of skills in the pelvic and breast examinations
7. Improve management of specific clinical issues, including: acute bleeding and pain, contraception, infertility, hormonal management menopause and perimenopause, sexually transmitted infections, preventive health care, specific issue in adolescent gynecology
8. Exposure to abortion service. (Optional)

INTRODUCTION: This elective is for students who are interested in a broader view of women's health. The goal is to direct the students’ attention to issues in women’s health and barriers to access to care by caring for women who only have episodic access to care (Urgent Care Clinic) or access through special categorical programs (Family Planning). The full range of ages of adult women from adolescents through menopausal aged women will be cared for. Students will have primary responsibility for the assessment of the patient and the development of management plans. Where appropriate, students will be able to follow their patients into the operative and inpatient settings. Students will have on going daily contact with faculty, and there will be weekly formal didactic

STUDENT EXPERIENCES

1. Abnormal vaginal bleeding
2. Pelvic pain
3. Primary care issues/health maintenance
4. Menopausal syndrome
5. Sexually transmitted infections
6. Contraception
7. Infertility
8. Adolescent gynecology

APPROXIMATE # OF PATIENTS EVALUATED EACH MONTH/STUDENT: up to 80

ON-CALL SCHEDULE & WEEKEND ACTIVITIES: Night-call is optional but is encouraged at least once a week.

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS: This elective will be conducted in different clinical sites at Harbor/UCLA Medical Center (Gynecologic Urgent Care and Pediatric/Adolescent Gynecology, and the Women's Health Care Clinic).
COURSE CHAIR: Malcolm G. Munro, M.D.  
PHONE #: (818) 364-3222

COURSE OBJECTIVES (in order of importance)
1. Independent evaluation and management of normal and complicated OB-GYN patients in an outpatient setting.
2. Develop extensive knowledge of disease processes such as: gestational diabetes, pregnancy induced hypertension, post dates pregnancy, pelvic inflammatory disease, abnormal cervical smears, pelvic masses, uterine bleeding, etc.
3. Enhance formal and informal presentation skills: all patients seen by student will be presented and discussed with faculty.
4. Acquire skills in areas such as: colposcopy, cervical/endometrial biopsy, cryotherapy.
5. Medical judgment, analysis of laboratory results.
6. Interpretation of sonographic and radiologic tests.
7. Use and interpretation of antenatal tests.

SUPPORTING FACULTY: All Ob/Gyn Faculty

STUDENT COORDINATOR: Judy Cruz  
PHONE #: (818) 364-3222

REPORT TO: OB/GYN Office, Rm #2B163 Olive View Hospital at 8am, 1st day of rotation.

PREREQUISITES: OB/GYN, Medicine, Surgery

AVAILABLE TO EXTERNALS: No

STUDENTS / PERIOD: max 1 min 1

DURATION: 3 weeks

2001-2002 ELECTIVES BEGIN WEEKS: 1, 5, 8, 11, 14, 17, 20, 27, 30, 33, 36, 39, 42, 45, 48

DESCRIPTION: The student will be part of a team of 10 providers divided among faculty, residents, and fellows in a very busy high-risk referral outpatient division -- patients represent a variety of complicated obstetrical and gynecological conditions.

ON-CALL SCHEDULE & WEEKEND ACTIVITIES:

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS:
COURSE CHAIR: Jonathan S. Berek, M.D.  
PHONE #: (310) 825-9945

SUPPORTING FACULTY:  
Faculty, Division of Gynecology Dept. of Obstetrics and Gynecology, UCLA, CHS

STUDENT COORDINATOR: Martie Banks  
PHONE #: (310) 825-9945

REPORT TO: Martie Banks, 24-126 CHS @ 08:30 a.m.

PREREQUISITES: Core clerkships in Ob/Gyn, Surgery I, and Internal Medicine

AVAILABLE TO EXTERNS: Yes

STUDENTS / PERIOD: max 1 min 1

DURATION: 3 weeks

2001-2002 ELECTIVES BEGIN WEEKS: 1, 5, 8, 11, 14, 17, 20, 27, 30, 33, 36, 39, 42, 45

INTRODUCTION: With the changes in how health care is supplied and renewed educational focus on ambulatory care, many undergraduate students of medicine are not exposed to the complexities or the subtleties of inpatient gynecologic care. We have developed this elective specifically for the student who desires to have an intense exposure to a busy operative gynecologic inpatient service. Because of the high surgical volume and the patient mix at this world-renowned tertiary referral center, the student will have the opportunity to observe the full range of operative gynecologic procedures performed for the management of benign disease processes, as well as participate in the care of numerous patients undergoing such.

STUDENT EXPERIENCES

COMMON PROBLEMS/DISEASES
1. Leiomyomata uteri
2. Endometriosis
3. Adenomyosis
4. Endometriosis
5. Symptomatic pelvic relaxation
6. Genuine stress urinary incontinence
7. Pelvic inflammatory disease

STUDENT OBJECTIVES (in order of importance)
1. To master the fundamentals of the management of the diseases leading to admission to an inpatient gynecology service.
2. To be able to complete a thorough pre-operative history and physical and develop an appropriate differential diagnosis and management pathway for patients presenting with disease included in objective 1.
3. To be able to describe the performance of the commonly performed surgical procedures employed in the management of patients presenting with the diseases included in objective 1.
4. To be able to perform post operative evaluation and appropriate intervention for patients undergoing management of diseases included in objective 1.
