ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS:
**COURSE OBJECTIVES** (in order of importance)

1. Teach the student clinical physiology and pathophysiology.
2. Teach the student principles of clinical pharmacology.
3. Teach the student how to prepare patients for anesthesia and surgery.
4. Introduce the student to the management of anesthesia for subspecialty surgery.
5. Airway management (control of airway with mask, tracheal intubation).
6. Familiarize the student with the techniques of general and regional anesthesia.
7. Introduce the practical pharmacology of sedatives, narcotics, and local anesthesia.
8. Introduce monitoring (EKG, BP, pulse oximetry and invasive monitors).
9. Experience establishing lines: IV, CVP, Swan-Ganz, and arterial lines.
10. Introduce critical care (resuscitation, IV fluid management, and mechanical ventilation).

**COURSE DESCRIPTION:**
Students will work on a one-to-one basis with an anesthesiology attending and resident in the operating room. In addition, students will be exposed to other aspects of anesthetic care, including outpatient anesthetic practice and preoperative assessment. Didactics will consist mainly of teaching the OR, and weekly grand rounds and resident lectures. Students with special interests are urged to contact the department prior to joining the course.
