AN250.02 ANESTHESIOLOGY

Advanced Clinical Clerkship  Location: WVA  2006-2007  Revised: 12/5/05

COURSE CHAIRS:
Richard Pieton, M.D.

PHONE #:  (310) 268-3221

SUPPORTING FACULTY:
Dr. Kevin Win

STUDENT COORDINATOR:
Victor Rosal

PHONE #:  (310) 268-3221
E-MAIL: victor.rosal@med.va.gov

REPORT TO:
Victor Rosal, Rm. 5404 at 7:00 am

PREREQUISITES:

AVAILABLE TO EXterns: No

STUDENTS / PERIOD: max 1 min 1

DURATION: 2 weeks

2006-2007 ROTATIONS BEGIN WEEKS:
2, 4, 6, 8, 10, 12, 14, 16, 18, 20, 22, 27, 29, 31, 33, 35, 37, 39, 41, 43, 45, 47, 49, 51

DESCRIPTION:
Two-week maximum elective. Excellent for fourth-year medical students to learn basic airway management, establishment of IV access, and gain insight about anesthesia

STUDENT EXPERIENCES

COMMON PROBLEMS/DISEASES
INPATIENT: 90%
1. Chronic Obstructive Pulmonary Disease
2. Coronary Artery Disease
3. Difficult Airway
4. Gen'l surgery (hernia, cholelithasis)
5. ENT (tumor, deviated nasal septum)
6. Cataract, lens implant
7. Orthopedic (fractures, total hip)
8. Neurosurgery (tumor, aneurysm)

COURSE OBJECTIVES (in order of importance)
1. Management of the airway — control of airway with mask, tracheal intubation.
2. Familiarize students with the principles and technique of general and regional anesthesia.
3. Preoperative evaluation of patients for anesthesia.
4. Anesthesia for general surgery and the surgical sub-specialty i.e., cardiac, neuro, ENT, ophthalmologic orthopedic, and urologic.
5. Establishing lines: IV lines.
6. Preoperative fluid management.
8. Student may go to codes with supervising personnel if he or she wishes.

REPORT TO:  Dr. E. Yang or Y. Wu, 2nd Floor Surgery Suite at 8 a.m. first day of clerkship

PREREQUISITES:  None

AVAILABLE TO EXTERNALS:  Yes

STUDENTS / PERIOD:  max 1 min 1

DURATION:  3 weeks

2006-2007 ROTATIONS BEGIN WEEKS:  
30, 47

DESCRIPTION:  This elective introduces the students to the skills associated with anesthesia which are essential and useful to physicians of any specialty. These include airway management, the care of the unconscious patients, cardiopulmonary resuscitation, and management of acute surgical emergencies.

COURSE OBJECTIVES (in order of importance)
1. Airway Management.
2. Knowledge of common anesthetic agents.
3. Knowledge of how a patient’s condition affects his or her response to anesthesia.
4. Knowledge of different anesthetic techniques.
5. Knowledge of regional anesthesia.
6. Pre-operative evaluation anesthesia record keeping.
7. Interpretation of blood gases, pulmonary function testing, SG monitoring.
8. Post-operative care and evaluation.
9. Knowledge of essential and important drugs used in resuscitation.

STUDENT EXPERIENCES

COMMON PROBLEMS/DISEASES
1. Airway Management Problems
2. Trauma, Shock Patient
3. COPD, Asthma
4. Coronary Artery Disease
5. Diabetes
6. Renal Failure
7. Hypertension
8. Multisystem Dysfunction

FUNDAMENTALS OF ANESTHESIOLOGY

COURSE OBJECTIVES (in order of importance)
1. Preoperative evaluation and assessment of patient prior to surgery, including optimization of patient prior to anesthesia.
2. Instruct the students the principles and techniques of general and regional anesthesia, their indications and their contraindications.
4. Perioperative fluid and electrolyte management.
5. Non-invasive and invasive monitoring. Knowing their indications and contraindications.
6. Pharmacologic use of anesthetic agents.
7. Cardiopulmonary resuscitation in neonates, pediatrics and adults.
8. Placement of intravenous and intra-arterial lines.
9. Post-operative recovery room management, including post-operative pain, nausea/vomiting, arrhythmia, fluid and electrolyte problems of patients in the recovery room.

DESCRIPTION:
The mission of the anesthesiology clerkship is to train medical students who, as primary care practitioners, will provide competent and compassionate service to patients. We will apply some of the science of Anesthesia and clinical teaching in Anesthesiology to help meet some of the health care needs of people in our community. This will involve treatment of significantly ill/complex patient cases in diverse patient population. The medical student will participate in the ongoing care of patient including preoperative evaluation in the Perioperative Care Center (PCC), Surgical and Medicine Floor, Intensive Care Unit. This will also involve optimization of patient prior to surgery, introp and post-op anesthesia management including 24 hours anesthesia follow-up of inpatients after surgery. They will be given substantial patient care responsibilities equivalent of an intern. They will be exposed to acute pain management, regional blocks and peripheral nerve blocks for both intraoperative anesthesia and post-operative analgesia. The student will have the opportunity to place arterial lines and large bore intravenous lines as indicated for the cases.

STUDENT EXPERIENCES
COMMON PROBLEMS/DISEASES
1. Airway management
2. Hypertension, Coronary Artery Disease & Peripheral Vascular Disease
3. Drug addiction
4. Obesity, Obstructive Sleep Apnea
5. Diabetes, End Stage Renal Disease, Addison's Disease
6. Obstetrical (Preeclampsia, Multiple Pregnancy, Abruptio Placenta, Cardiac Disease)
7. Cardiac Disease
8. Multiple Trauma, Orthopedic Problems
9. Neurological Diseases and Emergencies

AN250.07 ANESTHESIOLOGY

Advanced Clinical Clerkship Location: OVH 2006-2007 Revised: 12/6/05

COURSE CHAIR: Rima Matevosian, M.D.  PHONE #: (818) 364-4350
COURSE OBJECTIVES (in order of importance)
1. Causes, effects, and therapy of hypoxia.
2. How medical and surgical diseases and the operations performed affect patients perioperatively.
3. How to medically evaluate a patient scheduled for surgery.
4. Airway management.
5. Basic monitoring techniques.
6. Pharmacology of anesthetic drugs.

PREREQUISITES: None

AVAILABLE TO EXTERNALS: Yes

STUDENTS/PERIOD: max 2 min 1

DURATION: 3 weeks

2006-2007 ROTATIONS BEGIN WEEKS:
2,5,8,11,14,17,20,27,30,33,36,39,42,45,48

DESCRIPTION: Students will work with clinical faculty in a busy county facility. The primary focus will be on how surgery and anesthesia affect patients with various diseases. Students will evaluate patients pre-surgery and participate in the patients’ anesthesia management and post-op care. Self-learning is expected and facilitated by Problem-Based Learning modules, some new AV teaching material and teaching software, including a simulator with an expert system. Time on OB anesthesia can be arranged.

2006-2007 ROTATIONS BEGIN WEEKS:  
2,5,8,11,14,17,20,27,30,33,36,39,42,45,48

DESCRIPTION:  This elective is designed to give the student hands-on training in the comprehensive evaluation, diagnosis and treatment of a wide variety of chronic pain conditions with emphasis on spinal medicine. These treatments include both medication management as well interventional techniques. Comprehensive evaluation includes dictation of each patient encounter. As the basic skills of evaluation and diagnosis are being obtained, the student is introduced to various pain procedures.

ON-CALL SCHEDULE & WEEKEND ACTIVITIES: None

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS:
COURSE OBJECTIVES (in order of importance)
1. Teach the student clinical physiology and pathophysiology.
2. Teach the student principles of clinical pharmacology.
3. Teach the student how to prepare patients for anesthesia and surgery.
4. Introduce the student to the management of anesthesia for subspecialty surgery.
5. Airway management (control of airway with mask, endotracheal intubation).
6. Familiarize the student with the techniques of general and regional anesthesia.
7. Introduce the practical pharmacology of sedatives, narcotics, and local anesthesia.
8. Introduce monitoring (EKG, BP, pulse oximetry and invasive monitors).
9. Experience establishing lines: IV, CVP, Swan-Ganz, and arterial lines.
10. Introduce critical care (resuscitation, IV fluid management, and mechanical ventilation).

COURSE DESCRIPTION:
Students will work on a one-to-one basis with an anesthesiology attending and resident in the operating room. In addition, students will be exposed to other aspects of anesthetic care, including outpatient anesthetic practice and preoperative assessment. Didactics will consist mainly of teaching the OR, and weekly grand rounds and resident lectures. Students with special interests are urged to contact the department prior to joining the course. Students will rotate to two different sites during their rotation: Santa Monica Hospital and CHS in Westwood.
