MD199.04 QUALITY MANAGEMENT IN A HEALTH FACILITY

2006–2007
Revised: 11/28/05

In-Depth Location: HARBOR

COURSE CHAIR: Tony Greenberg, M.D. (310) 222-2168

SUPPORTING FACULTY: Susan Black, R.N., M.S., Quality Assessment/Resource Management

STUDENT COORDINATOR: Tammy Jenkins (310) 222-2168 FAX: (310) 320-3084

REPORT TO: Tony Greenberg, M.D., Harbor-UCLA Medical Center, 1000 W. Carson St. N-25.

PREREQUISITES: None

AVAILABLE TO EXTERNALS: Yes

STUDENTS / PERIOD: max 2 min 1

DURATION: 3 weeks

2006–2007 ROTATIONS BEGIN WEEKS:
12, 15, 18, 30, 33, 36, 39, 42, 45

COURSE OBJECTIVES (in order of importance)
1. Knowledge of basic components of quality management programs.
2. Understanding the benefit of a cooperative relationship between administrative and medical staff leaders.
3. Understanding the impact of the individual physician and the healthcare system on the quality of patient care.
4. Knowledge of the use of clinical data related to quality of patient care, including its limitations.
5. Understanding of methods for performing and reporting peer review in a medical staff organization.
7. Knowledge of the role and functions of process action teams.
8. Understanding clinical claims management in medical malpractice.
9. Experience in developing a clinical practice guidelines or algorithm.

DESCRIPTION: The student in this elective attends medical staff committee meetings dealing with performance improvement and monitoring the quality of various patient care functions, e.g., infection control committee, pharmacy and therapeutics, blood utilization, etc. In addition, there is generally at least one QI project that the student will participate in. With electives limited now to 3 weeks, it's hard to predict exactly which committees will be meeting during that time period. Generally, though, there are enough meetings to give the student the flavor of how the medical staff collaborates with other hospital functions to evaluate and improve care.

ADDITIONAL COMMENTS AND OTHER SPECIAL REQUIREMENTS:
MD199.05  MEDICAL MEDIA AND BROADCASTING

In-Depth  Location: ASSOC (NBC News TV)  2006–2007  Revised: 12/21/05

COURSE CHAIR:  PHONE #:
Bruce M. Hensel, M.D. (818) 840-4431

COURSE OBJECTIVES (in order of importance)
1. To expose the student to media and medical broadcasting.
2. To develop the student's communicative skills as a physician, advisor, and public speaker (oral presentations).
3. To develop the student's researching, investigative, and informational evaluation abilities.
4. To improve judgment of new medical procedures.
5. Knowledge of public health, environmental and preventive information, and evaluation.
6. Utilization of public and private health resources.
9. Knowledge of the most up to the minute breaking medical research-worldwide.
10. Knowledge and evaluation of latest treatments and diagnostic tests.

SUPPORTING FACULTY:

STUDENT COORDINATOR:  PHONE #:
Bruce M. Hensel, M.D. (818) 840-4431  E-MAIL: bruce.hensel@nbc.com

REPORT TO: Dr. Hensel, KNBC TV — News Room, 3000 W. Alameda Ave., Burbank at 8:00 A.M.

PREREQUISITES: Fourth-year students only

AVAILABLE TO EXTERNALS: Yes

STUDENT OBJECTIVES (in order of importance)

STUDENTS / PERIOD:  max 1 min 1

DURATION: 3 weeks

2006–2007 ROTATIONS BEGIN WEEKS:
By Arrangement

DESCRIPTION: This will be a one-on-one experience for the student. It will expose the student to all aspects of media, medical broadcasting, research, investigation, compilation, and creation. As media becomes more important for the patient and the doctor, it will help hone skills essential to the practice of medicine now and in the future. The course will not involve patient care. Instead it will focus on the ever growing role of media in medicine and enable the student to explore his/her interest in that area.

STUDENT EXPERIENCES

COMMON PROBLEMS/DISEASES
1. Cardiovascular problems
2. Medical Ethics
3. Biogenetics
4. New technology (laser, laparoscopy, etc.)
5. Vaccinations (adults and children)
6. Latest surgical techniques
7. Infectious diseases as they affect the public

10,12,14,16,18,20,22,28,30,32,34,36,38,40,42,44,46,48

DESCRIPTION: Recent studies indicate that more than 80% of Americans w/ cancer use some form of integrative or alternative medical therapy. Overall, it is estimated that US healthcare consumers spend about $27 billion/year on these alternative treatments (Ann. Int. Med., 135:189, 2001). This course is intended to introduce students to current concepts and practices in integrative cancer medicine, with opportunities for both research and clinical experiences. Students will learn about methods used for the discovery of new antitumor therapeutics from natural sources and new, evidence-based approaches in clinical-translational research. In addition, students will participate on an inpatient palliative-care service for patients with advanced malignancy and on outpatient services emphasizing conventional as well as alternative and complementary medical practices in internal medicine and oncology.

DURATION: 3 weeks (For 2 weeks, submit a Drop/Add form after June 2, 2006)

2006–2007 ROTATIONS BEGIN WEEKS:
2,5,8,11,14,17,20,27,30,33,36,39,42,45,48

COURSE OBJECTIVES (in order of importance)
1. The adoption of a management as an opposed to curative approach to chronic spine and musculoskeletal pain patients.
2. Learn brief psychological assessment for patients with pain, including substance abuse potential and depression.
3. Learn appropriate pharmacotherapy for chronic and acute pain.
4. Gain an understanding of interventional approaches to spine and musculoskeletal pain.
5. Learn a musculoskeletal and spine exam for acute and chronic pain.
7. Learn MRI and X-ray reading and interpretation of the spine and extremities.
8. Learn timing of test ordering and interventional procedures during work-up and management of spine and musculoskeletal pain.
9. Understand the use of electromyographic testing and diagnosis for peripheral nerve disease.

DESCRIPTION:
The Comprehensive Spine Center at UCLA and the VA Greater Los Angeles Health Care System Center consists of a Multidisciplinary Non-Operative musculoskeletal and spine pain management team. Students will have an opportunity to participate in the evaluation of both chronic and acute musculoskeletal and spine pain patients under the supervision of a multidisciplinary team. This includes medication management, physical therapy, psychological assessment, interventional procedures, peripheral nerve diagnosis with electromyography and the development of a comprehensive management plan for musculoskeletal and spine. Students will also have an opportunity to observe and help perform interventional spine or musculoskeletal pain procedures such as nerve blocks, facet blocks, muscle, joints and tendon injections, discograms, and spinal cord stimulator implantation under direct supervision. Students will also attend scheduled lectures geared toward spine and musculoskeletal pain management.

STUDENT EXPERIENCES

DESCRIPTION:  The Palliative Treatment Program at VAMC West Los Angeles consists of a consultative service for the entire hospital. A multidisciplinary team approach is used to provide or recommend palliative care measures for terminally ill patients and to optimize the quality of life of patients wishing hospice care. Various teaching aids, including videotapes and reading materials, are available. Emphasis is on learning the principles of palliation and the skills required in providing palliative care. The student will be following consult patients and patients in Geriatrics and Extended Care Units programs. Student may also have the opportunity to visit community hospice programs.

COURSE OBJECTIVES (in order of importance) 
1. The adoption of a caring, as opposed to curing, role for health care professionals.
2. Learn the psychological stages of the dying process, grief reactions, and the pathophysiology of death and dying.
3. Ethical and legal issues in the care of the terminally ill.
4. Accurate prognostication and communication of prognosis.
5. Other aspects of communication with patient and family, including management of emotional and psychological issues.
6. Effective methods of symptom control, including relief of pain, fever, nausea, dyspnea, pruritus, and other gastrointestinal, respiratory, urinary, cutaneous, CNS, musculoskeletal, and systemic symptoms.
7. Gain an understanding of the patient and family in the context of the home environment.
8. Learn to provide care as a member of a coordinated multidisciplinary team.
10. Medical record keeping (data collection, record keeping, writing consults).
11. Increase the student’s confidence and ability to give oral presentations.

DESCRIPTION:  The SCOPE Child and Family Resource Center at UCLA, located in the 200 Medical Plaza Children's Health Center, is a project run by undergraduate and medical students with the purpose of bridging the gap between social work and physicians, with the goal of enhancing overall patient health and well-being. Fourth year medical students will have the opportunity to become familiar with the unique challenges of caring for the underserved in a variety of clinical settings and how to approach patient health in an integrated manner--addressing social, medical, psychiatric, and preventive medicine issues. They will also have the opportunity to translate their experiences into meaningful community resource development, and outreach and gain appreciation for patient advocacy and teaching in their careers as physicians. Students will be involved with the following site: Venice Family Clinic, Culver City Youth Health Center, Burke Clinic, Samoshel and Westwood Student Run Homeless Family Clinics, Mobile Clinics, LA Free Clinics, SVA Home-based Primary Care.

COURSE CHAIR: Susan Baillie, Ph.D. (310) 794-4027

SUPPORTING FACULTY: LuAnn Wilkerson, Ed.D., Tony Kuo, MD and various faculty serving as small group facilitators in years 1–3

STUDENT COORDINATOR: Christina Yoon (310) 794-7018

COURSE OBJECTIVES (in order of importance)
1. To develop the skills, knowledge, and attitudes to be an effective teacher and leader in academic medicine
2. To actively practice teaching medical students in small group settings and reflect on the experience
3. To discuss critical issues related to medical education

DURATION: Requires completion of 8 teaching sessions and 3 evening seminars (course will be acknowledged on transcript.)

STUDENTS / PERIOD: max 40 min 1

2006–2007 ROTATIONS BEGIN WEEKS:
By Arrangement (Doctoring yr.1 – August 8; Doctoring yr. 2 – Sept 6; Doctoring yr. 3 – Sept. 8; Human Biology & Disease problem-based learning groups – beginning throughout the year depending on the block)

DESCRIPTION: This is a longitudinal experience that will require students to negotiate time from concurrent clinical electives for participation in a teaching practicum as Academic Fellows. During scheduled small group teaching sessions in required courses in medical school years 1, 2 or 3, Academic Fellows will co-facilitate with an experienced faculty member in a teaching setting of each student’s choice—including Doctoring 1, 2, or 3, or Problem-Based Learning (PBL) groups in any of the new curriculum blocks in years 1 and 2. This teaching practicum will include participation in related faculty development sessions. Learning theory and teaching practices will be addressed in seminar series held on four evenings.
